'Phone: UW 8631

ESTABLISHED 1895

WINTER AND SPRING, 1941.

A MESSAGE TO OUR CUSTOMERS

The increasing absorption into wartime industries of all available labour as well as the large numbers enlisting in our fighting forces means that Market Gardeners are hard put to it to carry on. They realise, however, that vegetable production is as essential as any other wartime production as the health of the community is of first importance and depends on ample seasonable vegetable supplies.

We have been taking all possible steps to ensure the supply of seeds of all important varieties and strains of vegetables. Present conditions concerning importations mean a far greater dependence on the local production of our best seeds than theretofore and we are proud to state that practically the whole of our supplies of seeds of Tomato, Rock-melon, Watermelon, Cucumber, Parsnip, Onion, Pumpkin, Marrow, Squash and a proportion of our Beets, Carrots, and Lettuce, as well as many of our more important Flower seeds are now locally produced from our own stock seeds and under our personal supervision. We take great pride in these Australian Grown lines and feel sure our customers will be pleased with them. We are always glad to advise our customers what, in our opinion, are the best varieties and strains to grow under greatly varying conditions of climates and market requirements.

We are at your service in this way.

RUMSEYS SEEDS PTY. LTD.

NEW SPRING AND SUMMER LETTUCE

IMPERIAL No. 44. Pkt. 3d.; $\frac{1}{2}$ -oz 1/-; oz. 2/-.

IMPORTANT—PLEASE READ

PRICES.—Prices given in this catalogue are those current when catalogue is made up for printing, and we reserve the right to alter any of them without notice at any time that conditions should warrant such action.

SUPPLY.—We cannot guarantee to supply all varieties and quantities as listed. Sometimes a variety will be sold out early in the season, due to unusual demand or shortage of crop, and occasionally we have to withdraw certain stocks from sale due to sudden falling off of viability.

QUOTATIONS.—Written or verbal quotations are for immediate acceptance, and subject to stock remaining unsold when order is received.

DESCRIPTIONS.—Descriptions given in this catalogue are of the type plants from which seed crops have been grown, and are intended to serve as a guide only to buyers. Under certain conditions of soil and climate considerable variation may occur with certain strains, particularly in respect to size, maturity and productivity. Where we have found any marked tendency to variation under any definite set of conditions or areas we have indicated it.

TERMS OF BUSINESS.—The terms on which our prices are based are cash with order. For cash we accept Commonwealth Bank Notes in registered letters, Australia postal notes and money orders. For larger amounts, cheques or bank drafts should be used. Money orders and postal notes should be made payable at Parramatta. Please add 6d. to country and interstate cheques for collection charges made by the banks.

AGENTS.—We do not appoint agents to sell any of our products, but welcome inquiries from retail seedsmen and storekeepers for quotations for bulk lots of vegetable and flower seeds.

SUBSTITUTING.—Sometimes owing to crop failures or shortage of stock we sell out of some varieties early in the season. In such cases we substitute the nearest variety, and send to save disappointment, but in no case do we expect you to keep the substituted article if you do not wish to do so. If you mark your order "do not substitute," we omit the variety. If you return the substituted seeds in original package unopened we give you credit for the amount.

REMITTANCE BALANCES.—In cases where remittance falls short of amount of order and customer has not established a credit account with us, it is our practice to omit portion of order to the extent of deficiency. Where amount remitted is in excess of cost of order, such as in allowance for transport costs or reduction of prices, it is our practice to send extra seeds for balances less than 1/6 and Credit for later orders amounts in excess of this. If so instructed, we will refund balance.

CONDITIONS OF SALE.—Although at time of sale our seeds comply fully with the provisions of the Agricultural Seeds Act, 1921 (N.S.W.), there are certain things beyond our control which may affect growth. Therefore, for our protection all goods are sold subject to the following conditions:—

We believe that all Seeds, Bulbs and Roots sold by us are of the description and kind specified by us at the time of sale, but owing to the practical impossibility in many cases of being certain of this, we give no understanding that such Seeds, Bulbs, or Roots will correspond with the description under which they are sold, and we make all sales subject to this condition. We further give no warranty, express or implied, as to their growth, description, quality, or productivity, and will not be in any way responsible for the crop. If the purchaser does not accept the goods sold to him on these terms they are at once to be returned to us.

"Rumsey's Honest Seeds" are tested for germination and vitality.

FREIGHT AND POSTAGE POLICY

WE PAY FREIGHT OR POSTAGE

On all orders for Packets and Ounces exceeding 2/6 in value, unless stated otherwise in Catalogue

ADD EXTRA FOR FREIGHT OR POSTAGE

On all orders for Packets and Ounces under 2/6 in value, and where specially mentioned in Catalogue

On all orders for $\frac{1}{4}$ lb. lots or over of Bulk Seeds.

On all PEAS, BEANS, FARM SEEDS, PLANTS, and GARDEN
SUNDRIES

Sowing Calendar for Winter, Spring & Summer

For County of Cumberland and similar climates. Gardeners in Mountain, Inland, Semi-Tropical and Tropical climates must make allowance for variation of their climatic conditions.

JUNE

VEGETABLES :

Sow seeds of:—

Broad bean, early cabbage, leek, pea, herbs, spinach beet, endive, lettuce, onion (late crop), mustard, radish and parsley. Tomatoes under cover.

Plant first crop potatoes in frost-free situations, eschallots, cabbage, onion, asparagus, herbs, leek, rhubarb and spinach beet.

FLOWERS :

Sow seeds of Ageratum, Alyssum, Antirrhinum, Bellis perennis, Calendula, Coreopsis, Candytuft, Carnation, Dianthus, Gaillardia, Godetia, Gypsophila, Larkspur, Linaria, Mignonette, Scabious, Statice.

Plant bulbs of Lilium, Lily of the Valley, Calla, Tuberose.

Plant: Fruit Trees, Roses, Ornamental Trees and Shrubs, Carnations, Violets, Strawberry, Grape Vines.

JULY

VEGETABLES :

Sow seeds of:—

Asparagus, spinach beet, early cabbage, carrot, small sowing parsnip, lettuce, onion (late crop), radish, tomatoes and egg plant (under cover), turnip, pea.

Plant potatoes, except low-lying frosty places, asparagus, Jerusalem artichokes, choko, cabbage, leek, lettuce, onion, spinach beet and herbs.

FLOWERS :

Sow seeds of Ageratum, Antirrhinum, Begonia (under glass), Bellis perennis, Calendula, Coreopsis, Candytuft, Carnations, Dianthus, Gaillardia, Godetia, Gypsophila, Linaria, Mignonette, Larkspur, Phlox (in warm position), Scabious, Statice.

Plant bulbs of Gladiolus, Agapanthus, Lili-ums, Lily of the Valley, Tuberose.

Plant: Fruit Trees, Strawberry, Roses, Ornamental Trees and Shrubs, Carnations, Cannas, Perennial Phlox, Violets.

AUGUST

VEGETABLES :

Sow seeds of:—

Asparagus, beet, spinach beet, French bean (about the end of month on higher ground), carrot, lettuce, marrow, cucumber, rock melon and squash in pots in sheltered position for transplanting, tomato and egg plant in warm sheltered bed, parsnip, leek, pea, parsley, mustard, turnip.

Plant asparagus, potatoes, choko, spinach beet, cabbage, lettuce, onion and tomato under cover or in open in frost-free situation.

FLOWERS :

Sow Acroclinium, Abronia, Ageratum, Antirrhinum, Arctotis, Aster (under glass), Begonia (under glass), Calendula, Coreopsis, Candytuft, Carnations, Centaurea, Chrysanthemum, Delphinium Chinensis, Dianthus, Didiscus, Gaillardia, Gypsophila, Helichrysum, Marigold (latter part of month), Mignonette, Perennial Pea, Phlox, Scabious, Statice, Verbena (in warm spot).

Plant bulbs of Gladiolus, Begonia, Gloxinia.

Plant: Fruit Trees, Ornamental Trees and Shrubs, Roses (early in month if possible), Carnations, Violets, Perennial Phlox.

SEPTEMBER

VEGETABLES :

Sow seeds of:—

All kinds of French beans, asparagus, beet, spinach beet, cape gooseberry, capsicum (pepper), carrot, celery, cucumbers, egg plant, lettuce, melons, parsley, parsnip, marrow, pumpkin

and squash, pea (quick maturing kinds), peanut, radish, sweet corn, tomato and turnip.

Plant potatoes, tomato, egg plant, cabbage, sweet potato, leek, choko, spinach beet and onion.

FLOWERS :

Sow Acroclinium, Amaranthus, Antirrhinum, Arcotis, Aster, Balsam, Begonia, Coreopsis, Capsicum, Carnations, Celosia, Chrysanthemum, Dahlia, Dianthus, Didiscus, Eschscholtzia, Gaillardia, Gypsophila, Helichrysum, Marigold (African), Nasturtium, Petunia, Phlox, Portulacca, Salpiglossis, Salvia, Sunflower, Tithonia, Torenia, Verbena, Zinnia.

Also all summer climbers and lawn grass seeds.

Plant bulbs of Dahlia and Gladiolus, Begonia, Gloxinia.

Plant: Trees and Shrubs, Passion Plants, Chrysanthemums, Carnations.

OCTOBER

VEGETABLES :

Sow seeds of:—

All beans except broad beans, beet, spinach beet, carrot, cucumber, cape gooseberry, egg plant, lettuce (where to grow), marrow, melons, pumpkin, squash, radish, peanut, sweet corn, turnip, tomato and pepper.

Plant tomato, egg plant, cape gooseberry, sweet potato.

FLOWERS :

Sow Amaranthus, Antirrhinum, Asters, Balsam, Capsicum, Celosia, Cosmos, Dahlia, Eschscholtzia, Gaillardia, Gloxinia, African Marigold, Nasturtium, Coleus, Petunia, Phlox, Portulacca, Mesembryanthemum, Salpiglossis, Salvia, Sunflower, Tithonia, Verbena, Zinnia, Summer Climbers.

Plant bulbs of Dahlia, Gladiolus.

Plant: Trees and Shrubs, Coleus, Ferns, Palms, Passion Vines.

NOVEMBER

VEGETABLES :

Sow seeds of:—

All kinds of beans except broad, beet, spinach beet, marrow, pumpkin, squash, tomato, cucumber, lettuce (where to grow), egg plant, pepper, cape gooseberry, peanut, radish, turnip, sweet corn and rock melons.

Plant tomato, sweet potato, egg plant, cape gooseberry.

FLOWERS :

Sow Amaranthus, Antirrhinum, Aster, Balsam, Begonia, Capsicum, Celosia, Coleus, Cosmos, Didiscus, Eschscholtzia, Kochia, African Marigold, Mesembryanthemum, Petunia, Phlox, Portulacca, Salpiglossis, Salvia, Sunflower, Tithonia, Verbena, Zinnia. Also Summer Climbers.

Plant Dahlia (green plants), Trees and Shrubs, Coleus, Palms, Ferns, Passion Vines.

DECEMBER

VEGETABLES :

Sow seeds of:—

French beans, (dwarf, runner and wax), beet, cabbage, celery (under shade), cucumber, radish, lettuce (where to grow), marrow, pumpkin, squash, cape gooseberry, cauliflower, tomato, sweet corn and turnip.

Plant out tomatoes, sweet potato, cape gooseberry, egg plant and pepper.

FLOWERS :

Sow Antirrhinum, Aster, Balsam, Cosmos, Delphinium, Didiscus, Kochia, African Marigold, Pansy (end of month), Petunia, Phlox, Portulacca, Stocks (end of month), Sunflower, Tithonia, Viola (end of month), Zinnia.

Plant Dahlias (green plants), Bouvardias

BEANS and PEAS

We take the greatest care in selecting seed crops of these important lines.

BUSH FRENCH BEANS

BROWN BEAUTY.—Most outstanding as regards earliness and yield. Produces long straight pods not quite so broad as Canadian Wonder. Gives 2 or 3 very heavy pickings, but pods must be marketed as soon as ready otherwise they get very tough. Sets pods better than Tweed Wonder under heat wave conditions. Pkt. 6d (post paid 8d).

NEW DISCOVERY.—May be classed as an improved Feltham Prolific. Also known as Wonderful. Dwarf, early heavy cropping variety. Pkt. 6d (post paid, 8d).

CANADIAN WONDER.—Popular market bean, very hardy. Pkt., 6d (post paid, 8d).

HAWKESBURY WONDER.—A new dwarf early maturing french bean of great promise. Produced by the Plant Breeding Branch of N.S.W. Department of Agriculture for resistance to "halo" blight and pod spot diseases. Produces long pods of good quality. Well suited for early Spring and Autumn crops. Pkt. 6d. (post paid 8d.).

TWEED WONDER.—Originally selected from Canadian Wonder for earliness, heavy cropping and resistance to pod spot. Not resistant to Halo Blight, but where seed is obtained from clean crops, as are our supplies, we can thoroughly recommend it as an excellent bean for early and late sowings. Our crops have been inspected and passed as Government Recommended seed by officers of the N.S.W. Department of Agriculture. Pkt. 6d. (post paid, 8d.)

BURPEES STRINGLESS GREENPOD.—

An excellent home garden and local sale variety for early or late crops. Pods very thick and fleshy, finest quality and practically stringless. Not popular for market but should be good for canning. Pkt. 6d. (post paid, 8d).

BUSH BUTTER BEANS

Pkt. 6d. (post paid, 8d).

STARTLER WAX.—Crops heavily, bearing large, round, fleshy, stringless beans of fine flavour

BRITTLE WAX.—Best of all the wax or butter beans. Beans round and fleshy, stringless and tender. The beans retain their yellow colour when cooked, super-fine flavour.

CLIMBING FRENCH BEANS

Most climbing varieties show more resistance to Mosaic and Anthracnose than do the dwarf types. Pkt. 6d. (post paid, 8d); except where stated.

EPICURE.—A flat bean, enormous cropper, and delicious cooked.

CLIMBING STRINGLESS GREENPOD.—

Uniformly straight pods, 6 to 8 inches in length, rich green, and very meaty, entirely stringless. Sometimes called White Seeded Kentucky Wonder.

SCARLET RUNNER (Improved).—Bears enormous pods, 12 to 18 inches long. Only suitable for cool districts.

YARD LONG OR SNAKE.—Fleshy beans 18 to 20 inches long. Pollinates freely and sets a good crop in districts too hot for French beans to set. Pkt. 6d.; $\frac{1}{4}$ lb., 2/-. Post paid.

CLIMBING BUTTER or WAX

GOLDEN CLUSTER.—A most popular climbing butter bean. Pkt. 6d. (post paid, 8d).

BEANS AND PEAS—(Continued)

BUSH LIMA BEANS

FORDHOOK BUSH.—Beans are rather thicker and larger than any other sort; great croppers. Pkt. 9d. (post paid, 1/-).

SUGAR PEAS

TALL.—Require staking like beans. The pods are cooked whole. Pkt. 6d. (post paid, 8d.).

PEAS

In the coastal and warmer climates peas are best treated as a winter crop, sown in Autumn. In the cooler and mountain climates spring sowing is best.

W. F. MASSEY.—18 inches. An extra early pea of exceptional merit. Ready three weeks before Greenfeast. Recommended for a quick crop in autumn or spring. For an extra early pea it is very prolific giving two or three good pickings of well filled bright green pods. Sold extensively as "Gem" by Sydney seedsmen. Pkt. 6d (post paid, 9d.).

HURSTS IMPROVED.—A large podded main-crop pea particularly suitable for upland districts. Has shown marked resistance to Bacterial Blight. We shall be glad to hear what customers think of this new introduction. Pkt. 6d. (post paid 9d.).

RICHARD SEDDON.—20 inches. The best second early pea for market or home use. Heavy crops of exceptionally well filled pods. In season between W. F. Massey and Greenfeast. Pkt. 6d. (post paid, 9d.).

GREENFEAST.—30ins. This is the most popular market pea. Bright green pods make it readily saleable. Does not stand wet conditions as well as W. F. Massey. Crop can be considerably increased by growing on wire trellises. Pkt. 6d. (post paid, 9d.).

YORKSHIRE HERO.—An old favourite, main cropper, very sweet to the taste. Pkt. 6d. (post paid 9d.).

ALDERMAN.—The best tall-growing variety for stakes or trellis. Large crops of enormous pods. Replaces Telephone, Duke of Albany and other tall growing varieties. Pkt. 6d. (post paid 9d.).

Vine Fruit

PASSION FRUIT

COMMON PASSION (*Passiflora edulis*).—

The passion fruit has become a very important commercial crop. As a money-maker the common passion planted out in frost-free localities, in late spring, for a winter crop is unrivalled. Our seed stock is the best available for this purpose.

Seeds.—Pkt., 6d.; oz., 1/6; $\frac{1}{4}$ lb., 4/6; lb., 12/6.

Plants (from open ground).—6d. each; 3 for 1/-; 2/- doz.; 10/- 100; 70/- 1000; freight extra.

THE CHOKO

For mild climates only. This fruit is as easy to grow as a cucumber, and is used for many culinary purposes. The seed is incorporated in the large green fruits. They must be planted together and should be started in large pots or tins in a warm sheltered spot and planted out when all frost danger is over. Fruits are available from May to August. 6d. each, 5/- dozen. Freight or postage extra. Packing and postage on one, 1/-.

The Choko

Vegetable Seeds and Roots

$\frac{1}{2}$ oz. at 1 oz. rates (subject to minimum charge of 8d per item) unless quoted otherwise.

ARTICHOKE

JERUSALEM.—Not generally grown from seeds. Rhizomes (bulbous roots) ready June to August. 3d. lb.; freight extra.

Special quotes for larger lots.

CRESS

TRIPLE CURLED or LAND CRESS.—

This is used as a salad with mustard. Pkt. 3d.; oz. 1/-.

ASPARAGUS

MARY WASHINGTON.—Has proved to be nearly rust free.

Seeds.—Pkt. 6d.; oz. 1/-.

Roots available June, July, and August. 25 for 3/6; 10/- 100; freight extra.

SWEET CORN

Pkt. 6d. (post paid, 9d.).

every garden should have a row of this delicious vegetable. Sown every two weeks in spring and early summer.

CAPE GOOSEBERRY

GOLDEN NUGGET.—This is the result of over twenty years selection. An enormous yellow fruit bursting out of the husk. It sometimes reaches two inches in diameter.

Recommended for preserves or jam, as fruits are unpalatable to eat raw. The plants are enormously prolific. Pkt. 6d.; $\frac{1}{4}$ oz. 2/6; oz. 7/6.

COMMON CAPE GOOSEBERRY.—(Physalis edulis). This variety is a biennial, and in mild climates produces its best crop of fruit during the second season. Pkt. 6d.; $\frac{1}{4}$ oz., 1/6; oz., 4/6.

GOLDEN BANTAM.—This popular and excellent variety is still one of the best in spite of many recent introductions. Very early maturing and delicious flavour.

THE BURPEE.—Extra early amber seeded variety of exceptional quality and rather more vigour than Golden Bantam.

WHITE EVERGREEN.—Attractive large cobs with broad grains, mid-season maturing. Considerably more vigorous in growth than most other varieties of Sweet Corn.

HOT KAPS

Hot Kaps are thin paper hoods for protecting seed and hastening germination. They are placed over a group of seeds and are later slashed, then removed as the season advances.

Hot Kaps are inexpensive and very effective and with methodical use they should more than pay their way.

Price:—15/- per 100; 120/- per 1,000, freight extra. 1 dozen 2/6, postage 4d. extra.

SILVER or SPINACH BEET

Pkt. 3d.; oz. 8d.; 2oz. 1/- each variety.

Spinach beet, from its continuous cropping habit, has taken the place of true spinach in N.S.W..

LUCULLUS.—Large ruffled light green leaves, broad mid-rib.

FORDHOOK GIANT.—Rich dark green, crinkled leaves, up to 10 inches in width and 2½ feet in height. Stems pearly white, 2½ inches wide, thick and succulent. Special strain.

Fordhook Giant.

HALF LONG BEET

Pkt. 3d.; oz., 8d.; 2oz., 1/-.

Requires deep soils, cool climate and autumn planting.

OBELISK (Rumsey's Special Strain).—Half Long, good colour and flavour. Fine for slicing.

TURNIP ROOTED BEET

Pkt. 3d.; oz., 8d.; 2oz., 1/- each variety.

Turnip-rooted beet may be sown almost any month.

GREEN TOP BUNCHING.—A new market Beet of the Early Wonder type. Especially suitable for Winter crops for bunching because of its very vigorous bright green tops.

EARLY WONDER (Rapid Red).—Fine quality beet for early market or home garden. Our strain has been selected for quick maturity and quality of roots. Good tops for bunching.

IMPROVED DETROIT DARK RED.—A pure line strain of this remarkable market variety. Fine dark colour.

DERWENT GLOBE.—The seed of this beet is locally produced and therefore well acclimatised to Australian conditions. It is of the Improved Detroit type but more hardy and vigorous but with a little less of the fine quality in root texture and rich colour of the latter.

CROSBY'S EGYPTIAN.—Popular home garden and market variety. Fine quality red fleshed beetroot, growing to about 3 inches diameter.

THE NEW A.B.C. OF AUSTRALIAN VEGETABLE GROWING

This well known book, forty-six thousand copies of which have already been sold, has been thoroughly revised and brought up-to-date in this eleventh edition. We feel sure that many who found previous editions so valuable will want a copy of this up-to-date new edition thoroughly revised and partly re-written by Mr. Herbert J. Rumsey, the originator of **Rumseys Seeds Pty. Ltd.**, from which firm copies may be obtained as well as from most book sellers. Price 2/9 post free.

Cabbage

For Winter and Spring Sowing
See Autumn Catalogue for Full List

Packet 6d each variety.

CUMBERLAND.—A cross between Copenhagen Market and Glory of Enkhuisen. just the right size for present-day market demands. Matures a little more quickly than G. of E., but is slightly larger and a little later than C.M. Colour is right and size is right. Oz. 1/8.

GOLDEN ACRE.—An extra early small round headed cabbage. Extra fine quality and solid. Has taken the place of the once popular early St. John's Day for a home garden cabbage. Oz., 1/8.

ALLHEAD EARLY.—A popular cabbage for both autumn and spring crops. Forms good solid heads of medium size and not too many outer leaves. Oz., 1/8.

EARLY JERSEY WAKEFIELD.—Special stock strain. Sweetest small early cabbage for home use. Sugarloaf shape. Oz. 1/8.

COPENHAGEN MARKET.—Special stock strain. A quick maturing cabbage now becoming very popular for market. We have found it excellent for spring cropping and most reliable. Oz., 1/8.

SHORT-STEM DRUMHEAD (Early).—Grows close to the ground and makes very heavy heads. Blue green leaves are very tough, making it an excellent cabbage for severe conditions in late summer and winter. Main sowings in N.S.W. are November to January in most districts. Oz., 1/8.

SELECT SUCCESSION.—An excellent strain of this popular spring cabbage. Medium size second early in maturity. Drum-shaped heads are surrounded by large outer leaves. Oz., 1/8.

ENKHUISEN GLORY.—This popular large round headed market cabbage is used mainly as an early spring cabbage in the County of Cumberland and as a winter cabbage further north. In the highlands it may be used as an early summer or early autumn crop. Oz., 1/8.

MIDSEASON MARKET.—A variety which has done very well for spring coastal crops. Round headed type similar to Enkhuisen Glory and Burrawang in that it throws a percentage of off types. As it is about a week earlier than Burrawang and cuts better, growers will find it well worth while. Oz., 1/8.

Midseason Market.

USE SELECT SUCCESSION FOR SPRING CROPS

CAULIFLOWERS

Pkt. 6d.

Cauliflower seeds should be sown from December to March in the warmer parts, and November to February in the cooler districts. Manure heavily before planting out; irrigate well or apply water before they get too dry. Extra early varieties are not recommended for the County of Cumberland. Where plenty of water is available for irrigating, November sowings of early varieties in tableland districts are usually successful for autumn cutting. In parts of Victoria and Tasmania, early maturing varieties are successful from early spring sowings.

EARLY CAULIFLOWERS

SUPERIOR "K"—This is the most promising early variety we have had for many years. From late January sowing in coastal districts it has produced beautiful heads in 10 to 12 weeks from planting out. Has given excellent results in Perthville district from November sowing. Curd is deep and of fine quality and suitable size for market. Inner leaves fold over and protect the heads to a far greater extent than is the case with most early maturing varieties.
 $\frac{1}{4}$ oz. 4/6; oz. 12/6.

RUMSEYSNOW.—Our Australian grown strain of Select Snowball. Selected for greater length of leaf and to stand up to more vigorous autumn conditions than Burpeeana. Matures in about 3 months from transplanting. White deep curd well protected for a snowball type. $\frac{1}{4}$ oz. 3/-; oz. 10/-.

BURPEEANA.—Matures in 3 to 3½ months from planting out. The heads are so uniformly shaped and formed as to be remarkable. The foliage is full and of a fine dark green, and the inner leaves curl over the head and protect it against the weather. Burpeeana has a beautiful white curd, smooth and free from small leaflets, between the sections, and very attractive on the table when cooked. Very popular in the Perthville district for November sowing, for March-April cutting, but water and manure must be kept up to it. $\frac{1}{4}$ oz. 4/6; oz. 12/6.

BURPEE'S BEST EARLY.—Is a splendid variety both for market and the home garden. It is a 3½ months cauliflower, and sowings should be made in time to plant out not later than March or April for Autumn crops. $\frac{1}{4}$ oz. 3/-; oz. 10/-.

DRY WEATHER CAULIFLOWER.—This variety produces large pure white solid heads about a week later than the extra early varieties, such as Best Early. $\frac{1}{4}$ oz. 3/-; oz. 10/-.

EARLY PHENOMENAL.—Matures in about 3½ to 4 months from planting under good conditions. Not generally recommended for County of Cumberland conditions, and we do not recommend planting out before mid-February in coastal districts. $\frac{1}{4}$ oz. 1/9; oz. 5/-.

NUGGET.—May be classed as second early variety. Matures in about 4 months from planting. Large white deep heads on short stems. Semi-self protecting in habit. One of the earliest to mature in coastal districts from December-January sowings. Excellent canning variety. Cooks very white. $\frac{1}{4}$ oz. 2/6; oz. 7/6.

HAWKESBURY SOLID WHITE.—Another excellent second early variety, maturing in 3½ to 4 months from planting. Slightly more self-protecting than Nugget, and will stand a little longer when mature. $\frac{1}{4}$ oz. 2/6; oz. 7/6.

MUTTON'S FOUR MONTHS.—A very good cauliflower from a grower in the Bathurst district. $\frac{1}{4}$ oz. 3/-; oz. 10/-.

MID-SEASON CAULIFLOWERS

"EARLY" GREENLEAF (or Green Glazed).

—This cauliflower is quite distinct, having dark green leaves with a shiny surface. It is sometimes called "aphis proof" from its resistance to those pests. Matures in 4 to 4½ months from planting. $\frac{1}{4}$ oz. 1/9; oz. 5/-.

BORONIA GIANT.—Coastal districts and warmer parts of N.S.W. and Queensland. Planted out about the end of January or early February, will produce large snow-white heads about June, and in suitable localities, later planting will give equal results in 5 months from planting out. $\frac{1}{4}$ oz. 2/6; oz. 7/6.

PHENOMENAL MAINCROP.—One of the best for districts west of the dividing range. Matures in 5½ to 6 months, coming into head in early spring from autumn sowing. $\frac{1}{4}$ oz. 1/9; oz. 5/-.

SEEK ADVICE BEFORE PLANTING EARLY

TABLE CARROTS

Pkt. 3d.

LONG BUNCHING.—A longer and better coloured bunching carrot for market. Roots are 9 to 10 inches long under good conditions, and up to $1\frac{1}{2}$ inches diameter. When mature almost cylindrical and well stumped. Necks are small, but leaves tough. Requires good soil for best results. Oz. 8d.; 2oz. 1/-.

EARLY NANTES.—(Manchester Table). Half-long variety, with a stump root and a fine tap-root. The roots average about six inches in length, and $1\frac{1}{2}$ inches in thickness. Oz. 9d.; 2 oz. 1/3.

Red Cored Chantenay.

DANVERS HALF LONG.—Red Cored strain.

A first quality market carrot, becoming very popular for marketing in sacks or bunches. Oz. 8d.; 2 oz. 1/-.

ST. VALERY.—An intermediate carrot with long tapered roots, 10 inches in length.

Oz. 9d.; 2 oz. 1/3.

RED CORED CHANTENAY.—Extra fine quality, rich orange colour, with core almost the same colour as the flesh and of equal quality, stump rooted, uniform and delicious, now our most popular market variety. Oz. 9d.; 2 oz. 1/3.

LONG TYPE CHANTENAY.—Slightly longer than Red Cored Chantenay with more vigorous tops but not quite the quality. Suitable for winter crops. Oz. 9d.; 2 oz. 1/3.

IMPERATOR.—An excellent market carrot for those who desire a little more length than in Chantenay. Not quite so thick in the shoulder. Excellent carrot for bagging. Oz. 8d., 2 oz. 1/-.

EARLY SHORTHORN.—A fine variety for quick growth and for shallow soils. Oz. 1/-.

CELERY

Packet, 6d., each variety.

Celery does well from either early spring (July-August) or summer, and early autumn sowings. Plenty of water and rich feeding are necessary for success.

SUPREME GOLDEN.—An outstanding strain of Golden Yellow Self-Blanching type producing compact cylindrical plants 22 to 27 inches tall according to soil and growing conditions. Edible stems broad and thick, 7 to 10 inches to first joint. The lack of fibre in stalks of highly bred varieties of American origin such as this, make them highly desirable for home use or market. $\frac{1}{4}$ oz. 1/-; oz. 3/6.

Golden Phenomenal.

SOUTH AUSTRALIAN WHITE.—Chiefly grown in South Australia for sending to Interstate markets. Rather coarse quality but sells readily on account of its size. Oz., 4/3.

GOLDEN PHENOMENAL.—Heavy, compact and full-hearted; intermediate height. A top price market variety. $\frac{1}{4}$ oz. 1/-; oz. 3/-.

FORDHOOK.—A hardy variety of outstanding merit. Of dwarf type, the stalks are smooth and very thick. The colour snow white; the heart tinged with yellow. Flavour, nutty and crisp. $\frac{1}{4}$ oz. 1/-; oz. 3/6.

GIANT PASCAL.—A late variety, producing tall, thick stalks. Blanches to an attractive light yellow. Tasty and crisp. Oz. 1/6.

HERBS

Packet, 6d.

THYME.—Popular herb used for seasoning. Pkt. 6d.; oz. 3/-.

MARJORAM.—Sweet or knotted. Oz. 3/-.

EGG PLANT

Pkt. 6d; $\frac{1}{4}$ oz. 1/6; oz. 4/6.

NEW YORK IMPROVED LARGE PURPLE.—
A fine large variety.

BLACK BEAUTY.—Round shape, smooth deep purplish black skin. Good quality.

CUCUMBER

"STRAIGHT EIGHT".—Symmetrical almost cylindrical fruits, well rounded at both ends. Straight and eight inches in length under normal growing conditions. Skin deep green. Good market variety. Pkt. 3d.; $\frac{1}{2}$ oz. 8d.; oz. 1/-.

RICHMOND GREEN APPLE

A bright olive green skinned selection from the Crystal Apple variety. Good quality and flavour—excellent appearance—popular for market in north and west.

Pkt. 6d.; oz. 2/-.

BLACK DIAMOND (Kirby Staygreen).—Nearly a week earlier than Early Fortune. Good market variety. Stays green long after picking. Pkt. 3d.; $\frac{1}{2}$ oz. 8d.; oz. 1/-.

EARLY FORTUNE.—Early, and immensely productive. Fruits grow up to 9in. in length. The colour of the skin is a rich dark green and the flesh is pure white, firm and crisp; delicious flavour. Pkt. 3d.; $\frac{1}{2}$ oz. 8d.; oz. 1/-.

COMMERCIAL OR IMPROVED WHITE SPINE.—A perfectly shaped cucumber of medium length and large diameter, quite smooth, and remaining green after being picked; very productive. Pkt. 3d.; $\frac{1}{2}$ oz. 8d.; oz. 1/-.

APPLE SHAPED.—The apple shaped cucumber is at its best when the outer skin is almost white, before it starts to turn yellow. Pkt. 3d.; $\frac{1}{2}$ oz. 8d.; oz. 1/-.

CRYSTAL APPLE.—The skin is white without any trace of brown or yellow. Though this cucumber looks fine at any stage it should be marketed only before fully matured. Pkt. 3d.; oz. 1/6.

WHITE EARLY.—A long, white cucumber, growing 10 to 12in. long, and 3in. in diameter. Pale green while young, turning to a porcelain white. Pkt. 6d.; oz. 2/-.

BOSTON PICKLING.—Best variety to grow for commercial "gherkins". Pick when $1\frac{1}{2}$ to 2 inches long for best prices. Pkt. 3d.; $\frac{1}{2}$ oz. 8d.; oz. 1/-.

AFRICAN HORNED.—Unique, very late enormously prolific. Fruit while young may be eaten freely as apples; when ripe, with a spoon like passion fruit. Pkt. 6d.; oz. 2/-.

KOHL-RABI

See Autumn Catalogue.

MUSTARD

See Autumn Catalogue.

CUCUMBER—STRAIGHT "8"

LEEK

MUSSELBURGH.—A well-known, good and hardy sort. Pkt. 6d.

ONIONS

Pkt. 6d.

SWEET SPANISH VALENCIA.—A mild onion fairly early in maturity and carries fairly well. Becoming popular for markets in N.S.W. Sold out until February.

PRIZETAKER.—This onion has done well in all parts of Australia, and in very different classes of soil; for transplanting it is one of the best. It is a very large onion, and frequently measures over 4 inches in diameter. The skin is a beautiful golden brown, and the flesh very solid, crisp, juicy and mild. Sold out until February.

BROWN SPANISH.—The standard keeping onion. Hard to beat for general market purposes, select strain. Matures late in season. Oz. 1/6.

AUSTRALIAN EARLY BARLETTA.—A very select strain of this extra early flat white onion. Our most popular early flat white onion for market and home use. oz. 2/6.

HUNTER RIVER EARLY BROWN.—Select heavy cropping strain. Growers of Early Brown onions in Queensland and N.S.W. are advised to sow this variety for early market. Deep globular bulbs of excellent texture and quality. oz. 2/6.

Prizetaker.

HUNTER RIVER WHITE GLOBE.—A select strain of this early variety for commercial crops. Heavy globe-shaped bulbs of good quality and texture. A good onion to come in after Early Barletta. Sold out until February.

EARLY GRANO.—The most outstanding introduction in onions for many years. Introduced from Spain to U.S.A., it immediately became popular. Early maturity, freedom from tendency to "bolt", yield, and keeping qualities make it outstanding as an early variety. Skin is light brown. Flesh of Sweet Spanish or "Odourless" type, very mild and of good quality. Size medium to large. Necks thin. Bulbs a distinctive apple shape. Particularly recommended for Queensland and Coastal N.S.W., where it should be extremely early. Regret crop failed. New crop seeds February.

MAITLAND WHITE.—A select early strain of the popular Hunter River White Globe. oz. 2/6.

"ODOURLESS".—Globe shaped, vivid green leaf strain. A mid-season variety, producing large bulbs suitable for eating raw. Very poor keeper, so should be used quickly after harvest. oz. 3/.

IMPERIAL WHITE SPANISH.—The best main-crop white skinned variety. Shape similar to Brown Spanish. Excellent quality, good keeper and heavy cropper. Oz. 2/9.

MULTIPLIER ONIONS

Kinds not generally grown from seeds. Bulbs usually available from February to early Spring.

POTATO ONION.—True strain, excellent for cold climates. Sold out until autumn.

ESCHALLOT.—Excellent for salads. 1/- lb., post extra.

GARLIC.—Used for flavouring. 1/- lb., post extra.

BROWN SPANISH IS BEST FOR WINTER SOWING

LETTUCE

Packet, 3d, each variety, except where stated.

ICEBERG.—Handsome curly, light green leaves, with pink tint. Solid head. Good Summer lettuce. $\frac{1}{2}$ oz., 8d; oz., 1/-.

MIGNONETTE.—A crisp curly, small brown lettuce that succeeds in Fiji, and very hot climates. $\frac{1}{2}$ oz., 8d; oz., 1/-.

GREEN MIGNONETTE.—Careful breeding has eliminated the brown tint of the old type Mignonette Lettuce. Not quite so curly as the original but almost as hardy as regards hot weather. $\frac{1}{2}$ oz. 8d.; oz. 1/-.

SPECIAL STRAINS OF NEW YORK.

Growers of lettuce for market should try our different strains and adopt for each season the one that gives them the best results.

**NEW LETTUCE
IMPERIAL 44**

This new summer lettuce has turned out trumps. Do not fail to make a sowing this summer. Start about September or October and make regular sowings until February. Large heads of excellent quality. Oz. 2/-.

IMPERIAL 847 (Black Seeded).—This strain has given good results in our trials during summer months. A large hearted strain, but it does not show mildew resistance. Therefore only recommended for summer. Now one of our most popular varieties for spring, summer, and autumn. Oz. 1/4.

IMPERIAL "D."—Stands more frost than others. Our strain of this fine dark green lettuce has become very popular for winter planting. Mildew resisting. $\frac{1}{2}$ oz., 8d; oz., 1/-.

IMPERIAL "F."—One of best commercial strains for spring, summer and autumn. Combines the qualities of brown blight resistance with resistance to tip burn and mildew. $\frac{1}{2}$ oz., 8d; oz., 1/-.

IMPERIAL 615.—A strain which has become very popular for early winter and early summer crops. Stands cold weather well, has large showy hearts, but does not show the mildew resistance of Imperial "D." and Imperial "F." Is a good winter lettuce in dry seasons, and one of the best for sowing from August to October in County of Cumberland. $\frac{1}{2}$ oz., 8d; oz., 1/-.

MUSHROOM

See Autumn Catalogue.

Early Sugar.

WATERMELONS

Pkt., 3d; oz., 8d; 2 oz., 1/-; each variety, except where stated.

HAWKESBURY WILT RESISTING.—There is no doubt that this is the melon which growers, in areas where wilt is prevalent, have been looking for. Ideal market melon, oblong shape, light greenish-grey skin—seeds brownish black. Rich crimson flesh of fine quality. Matures a little earlier than Sugarstick. Pkt., 3d; oz., 9d.

ANGELINO BLACK SEEDED.—Excellent melon for shipping or local markets. Oval, green skin. Solid, very bright red, flesh of excellent quality.

Hawkesbury W.R.

Sugarstick.

KLONDYKE WILT RESISTING No. 7.—Excellent home garden and local sale variety. Oval shape. Flesh brittle and sweet. Pkt., 6d; oz., 2/-.

HALBERT HONEY.—The melons are large, sweet and tasty, melting in the mouth like honey, and leaving no fibre. Second early. One of the best home garden varieties.

EARLY SUGAR.—(Early Canada). Early, small and very prolific. Fruits round, skin mottled greyish green. In a good season may be 2 weeks earlier than Hawkesbury Wilt Resisting. Pkt. 3d; oz. 9d.

SUGARSTICK.—For many years the standard greyish green skinned market melon for Sydney markets. Now being rapidly superseded by Hawkesbury.

CKECKLEY'S SWEETS IMPROVED OR MARKET WONDER.—An excellent market melon, having dark green skin and rich red flesh. Large size, oblong, and of good eating quality.

TOM WATSON.—This old timer is still called for in some districts. Very large, long melons having a hard rind of a medium dark green colour. Carries well.

PRESERVING MELONS

RED SEEDED CITRON.—A very popular red-seeded variety. Pkt., 3d; oz., 8d; 2 oz., 1/-.

SNOW MELON.—The seed is contained in the central cavity like a vegetable marrow, making it very easy to prepare for jam, for which it is very fine. Pkt., 6d; oz., 2/-.

ANGELINO FOR QUALITY

ROCK MELONS

Pkt., 3d; oz., 9d; each variety; except where priced.

HONEY DEW—POWDERY MILDEW-RESISTANT.—A strain of this favourite late melon which, because of its resistance to mildew, will be of great help to growers of autumn crops. Pkt., 3d; oz., 1/-.

NETTED GEM or ROCKY FORD.—Very prolific, small early melon. Heavily netted, slightly ribbed. Oval shape, green flesh.

SPICY CANTELOUPE.—Fine large melons of exquisite flavour; stringless. Prolific and of vigorous growth. Pkt., 3d; oz., 1/-.

POWDERY MILDEW RESISTING, No. 45.—This is a remarkable introduction in many ways. Not only does it show resistance to some forms of powdery mildew (not downy mildew), but it can be fully vine ripened and remain edible for a long time. In size and shape it resembles Hales Best, one of the parents used in its production. An excellent shipping melon. Pkt., 3d; oz., 1/-.

HALES BEST, TRIUMPH or JUMBO STRAIN. This slightly larger type is just a nice size for market. Melons average about 6 ins. in length, are oval in shape, evenly netted and practically free of ribs. Matures early.

HALES BEST No. 36.—Is a selected strain, favoured by many growers as it is nearly round in shape, and shows practically no rib. Seed cavity is extremely small, giving a heavy weight of nicely flavoured salmon flesh. For packing in crates for distant markets it is highly desirable.

HALES BEST 9-36.—For those growers who like a little larger melon than Hales Best No. 36 this variety will appeal.

Powdery Mildew Resisting No. 45.

Jumbo Hales Best.

SYDNEY MARKET.—Fruit of medium size, with a fine heavy netting, and fairly distinct ribs. Averages about 5 lb. in weight. The flesh is bright salmon pink, and of excellent flavour.

PARSNIPS

Pkt. 3d.; oz. 8d.; 2 oz. 1/- each variety.

SHORT THICK.—A very early variety, roots filling out at an early stage, making it suitable for home gardens. When fully grown is 6 to 8 inches long and $2\frac{1}{2}$ to $3\frac{1}{2}$ inches thick. Good for bunching for market. Seed crops failed; probably no further supplies until January, 1942.

HOLLOW CROWNED.—The standard market variety. Matures later than Short Thick. Long, thick shouldered root of excellent quality.

MELBOURNE MARKET.—(Hollow Crowned). This extra select strain of hollow crowned is difficult to equal for uniformity and desirable market characteristics.

WHITE QUEEN.—A long thick parsnip of exceptional quality. Smooth white skin makes them very attractive.

PARSLEY

Pkt., 3d; oz., 8d.

See Autumn Catalogue.

PEPPERS (Capsicum)

Pkt., 6d.

CHINESE GIANT.—As big as a quart pot; very mild; delicious stuffed. $\frac{1}{4}$ oz., 1/9; oz., 5/6.

CALIFORNIA WONDER.—Stocky, upright plants, bearing heavy crops of large, broad, deep green fruits, turning bright red when ripe. Flesh is thick and sweet. $\frac{1}{4}$ oz., 2/6; oz., 7/6.

LONG RED CAYENNE.—Hot and pungent.

MARROWS and SQUASHES

All the summer squashes and vegetable marrows should be cooked while the outer skin is tender enough to scratch with the finger nail.

VEGETABLE MARROW

Pkt. 3d.; oz. 8d.; each variety, except where priced.

LONG WHITE (Bush).—Very prolific. Specially selected strain.

ZUCCHINI.—A select strain of Italian green bush marrow, fruits 12 inches long, dark green skin, mottled yellow when mature. Flesh thick, sweet and tasty.

MELBOURNE LONG WHITE (RUNNING).—Developed for the Melbourne market this marrow is white skinned and about 15 inches to 18 inches long. It is practically the same width throughout its length with a rounding off at each end. Early in habit it is a prolific cropper. We consider it would suit the Sydney market better than the long cream type now so extensively grown for the late summer market. Pkt. 3d.; oz. 1/-.

SUMMER SQUASH

Pkt., 3d; oz., 9d; each variety.

BUSH FORDHOOK.—A long pear-shaped variety 8 inches to 9 inches long when matured. A very prolific bearer. If gathered while still immature, the colour is white and no marrow or squash can approach it for delicious flavour. Later as the fruit matures it turns cream coloured and may be kept well into the winter.

EARLY WHITE BUSH SCALLOPED.—The very best of this type.

GOLDEN ACORN.—A new squash of small size, 6 inches long, 4 inches thick, strongly ribbed, somewhat pear-shaped. When young it makes a delicious summer squash. As the squash ripens it turns deep orange and may be kept right into the winter like a pumpkin when it is also greatly favoured as a table vegetable. A Golden Orange strain of the green skinned variety Table Queen.

GOLDEN CUSTARD (Bush).—Small flat squashes in profusion.

TABLE PUMPKINS

QUEENSLAND BLUE (MORANDINI TYPE).—

Best procurable and well worth the extra price. Medium sized pumpkin early maturing and good shape for market. Pkt. 3d.; oz. 1/-.

QUEENSLAND BLUE.—Selected Large Type.

This type satisfies the modern market trend of a slightly larger pumpkin. Our aim is to select a 10-12-lb. pumpkin having all the desirable characteristics of a first class Queensland Blue. Oz. 9d.

WARTED HUBBARD.—A dark green skinned Hubbard pumpkin. Skin is very rough as though covered with warts. Better keeping variety than other Hubbards. Pkt. 3d.; oz. 9d.

TRIANGLE.—Triangle or Shamrock. Medium sized pumpkin. Quality excellent. Most popular market variety in southern States. Grey skin—keeps well. Pkt. 3d.; oz. 9d.

(Pumpkins continued next page)

Selected Queensland Blue Pumpkins for "Stock" Seed.

USE SQUASHES WHEN IMMATURE

PUMPKINS—Continued**Pumpkin—Ideal.**

IDEAL.—Shape somewhat resembles the Queensland Blue variety. Medium to large pumpkins of excellent quality. The colour of skin is greyish green when mature. Pkt. 3d.; oz. 1/-.

KITCHENETTE HUBBARD.—A small glossy green Hubbard growing to about 5 lbs. in weight. Equal in flavour and quality to ordinary Hubbard but matures 10 to 14 days earlier. Recommended for early market crops or home gardens. Pkt. 3d; oz., 9d.

HUBBARD SQUASH.—Dark green fruits, quick maturing and keeps well. Pkt. 3d; oz., 9d.

RED or GOLDEN HUBBARD.—Very good. Pkt. 3d; oz., 9d.

BANANA.—A fine flavoured winter squash. Pkt. 3d; oz., 9d.

BUTTERCUP.—A very early maturing small to medium sized pumpkin of excellent quality. Green skin and bright orange flesh. Pkt., 3d; oz., 9d.

TROMBONE or RIO GRAMMA.—Best of all pie pumpkins. Pkt. 3d.; oz. 10d.

GRAMMA, PEAR SHAPED.—Pkt. 3d.; oz. 10d.

JUMBO or MAMMOTH.—The best large pumpkin for stock feed. Grows to an enormous size. Pkt. 3d.; oz. 10d.

PEANUTS

Pkt., 6d (post paid 8d).

SMALL SPANISH.—A standard variety; a good cropper, hardy.

VIRGINIAN BUNCH.—Larger and longer pods.

RADISHES

Pkt., 3d; oz., 8d; 2oz., 1/-; each variety.

WHITE ICICLE.—Fine long white. maturing 20 to 25 days.

SCARLET WONDER.—A scarlet turnip rooted variety popular with market growers for a catch crop because of its rapid growth and early maturity.

EARLY LONG SCARLET.—(Short Top). Early, crisp and fine flavour.

WHITE CHINESE.—These grow to a great size in China and Japan and are cooked like a turnip. Best sown in early autumn.

FRENCH BREAKFAST.—Olive shaped. Bright rose scarlet, white tipped. Flesh white, firm, crisp, juicy and tender.

SPARKLER.—Scarlet Turnip, white tipped.

SURPRISE MIXTURE.—A mixture of all sorts, short, long and medium.

ROSELLA

The Rosella is a hot climate plant, much more tender than the tomato. The beautiful red seed bracts are used for making jelly and summer drinks.

EARLY.—New strain which will mature in much shorter season than the old type. Pkt., 6d; oz., 2/6.

RHUBARB

Packet, 6d.

See Autumn Catalogue.

SWEET POTATO

Very seldom sets seeds, so rooted cuttings are planted.

Strong hardened plants available October to January of following varieties:—H.A.C. Pink (Pink skin yellow flesh); Porto Rico, very early, excellent flavour (flesh bright orange); Strassburg Yellow; Farmers Special; Ashburn. Rooted cuttings. 1/6 doz.; 8/6 100, post paid; 1/- doz.; 7/- 100, freight extra.

TURNIPS

Pkt., 3d; 2 oz., 8d; each variety.

WHITE STONE.—Good early sort.

PURPLE PRINCE.—A purple topped white globe shaped variety, very attractive for market. Early maturing and of good quality.

ORANGE JELLY.—The best of all this class turnip, flesh yellow, and not strong flavoured.

SWEDE TURNIPS

Pkt., 3d; 2oz., 8d; each variety.

CHAMPION OR IMPERIAL PURPLE TOP.—

Very popular strain, large roots, globular in shape. Yellow flesh of good quality.

CRAIG'S PURPLE TOP.—A select heavy cropping strain of Scottish origin. Excellent quality.

WINTER GREEN TOP.—Very attractive yellow globe shaped swede with olive green tops. Fairly early, good quality, even maturity.

TOMATO

SPECIAL STRAINS

For a number of years we have imported from U.S.A., Government Certified Strains of certain varieties which have been very suitable for N.S.W. and Queensland conditions. These strains will be discontinued as soon as existing stocks are exhausted.

We have carried out strain trials with the principal commercial varieties and we are now growing in Australia the whole of our requirements of these selected strains which will be catalogued with an indicator number following the variety name. This number will indicate the particular strain which we have found to be outstanding.

Varieties marked F.W.R. are those that have shown resistance to Fusarium Wilt. This must not be confused with Bronze or Spotted Wilt, as there are no commercial varieties which show much resistance to Bronze Wilt.

EARLY TOMATOES

POTENTATE.—F.W.R. Very heavy cropping smooth skinned, scarlet fruited variety. Produces large clusters of fine quality fruit—4.5 to the lb. Fruits maintain size to top of stakes. Early setting habit. Without doubt one of the best for present market requirements. Pkt. 6d.; $\frac{1}{4}$ oz. 1/9; oz. 5/-.

MARVANA.—F.W.R. The vine is similar to Earliana, being rather open and flat. Scarlet smooth fruits borne profusely. As fruits are of medium size it is becoming very popular for both spring and autumn crops for Sydney markets. Pkt. 6d.; $\frac{1}{4}$ oz., 1/-; oz., 3/-.

ROUGE DE MARMANDE No. 89.—Scarlet fruited variety of very early setting habit. Fruits inclined to be rough in shape but crops are heavy. Good results have been obtained in some of very early districts where Chinese type varieties are grown. Pkt. 6d.; $\frac{1}{4}$ oz. 1/9; oz. 5/-.

SALADS.—A special selection from the Curry or Planters Favourite variety popular for some years for glass-house culture. This selection has been made for increased yield and vigour. Cluster type producing medium sized scarlet fruits. Very heavy cropper where properly fed and watered. It has given very good results for spring and autumn open ground crops in some districts. "Buck" plants should be rogued out in seed bed. Pkt. 6d.; $\frac{1}{4}$ oz. 2/6; oz. 7/6.

BREAK O' DAY No. 33.—F.W.R. Grown extensively in Coff's Harbour district and many other parts of the north coast and Queensland. Pkt. 6d.; $\frac{1}{4}$ oz. 1/6; oz. 4/6.

CITY OF PARRAMATTA.—A new scarlet-fruited vigorous-growing variety of the cluster type. When staked, fruits average 4.5 to pound, slightly larger than a good Walker's Recruit, smooth skin, excellent quality. Pkt. 6d.; $\frac{1}{4}$ oz. 1/9; oz. 5/-.

AUSTRALIAN EARLIANA.—Select heavy cropping strain. Popular with growers in many coastal districts for a number of years. As it is not resistant to fusarium wilt it can only be recommended for use on new tomato land. On old tomato land it is rapidly being replaced by Marvana as a first early variety. Not a better strain of Earliana obtainable. $\frac{1}{4}$ oz. 1/6; oz. 4/6.

Rouge de Marmande No. 89.

Early Tomatoes—(Continued)**KEYSTONE (Penn State) CERTIFIED.—**

Has done remarkably well in the upper Hunter Valley and on western slopes of the dividing range in N.S.W. Also popular in parts of Queensland. For early unstaked crops. Plants are compact and of determinate habit of growth, and may be planted in rows 3ft. apart, plants 27 inches in the row. Heavy yields of fine quality scarlet fruits. Pkt., 6d.; $\frac{1}{4}$ oz., 1/6; oz., 4/6

KEYSTONE.—Regular. $\frac{1}{4}$ oz., 1/-; oz., 3/-.

EARLY PRIDE.—A pink Earliana, still grown to some extent from the Hunter River northward on new tomato land. Pkt., 6d; $\frac{1}{4}$ oz., 1/-; oz., 3/-.

SUNNYBROOK EARLIANA.—An old favourite for early staked crops in coastal areas. Pkt., 6d; $\frac{1}{4}$ oz., 1/-; oz., 3/-.

KULNURA RECRUIT.—Selection made by Mr. Anderson, of Kulnura, in the Gosford district. Long trusses of fruits of the cluster type. Small to medium in size. Skin bright scarlet, firm and smooth. Pkt. 6d.; $\frac{1}{4}$ oz. 1/9; oz. 5/-.

BONNY BEST, No. 10.—Early smooth, scarlet, of good size, solid, meaty, and of good flavour. A good cropper. Pkt., 6d; $\frac{1}{4}$ oz., 1/6; oz., 4/6.

ANTIBES.—An early variety from Europe which has shown more resistance to Bronze Wilt than most other varieties. Worth a trial for this reason alone in districts where Bronze Wilt is troublesome. Pkt., 6d; $\frac{1}{4}$ oz., 1/-; oz., 3/-.

GROTHEN'S RED GLOBE, CERTIFIED.—May be described as a better coloured Break o' Day. Pkt., 6d; $\frac{1}{4}$ oz., 1/6; oz., 4/6.

Grothen's Red Globe.

EARLIWINNER.—A very good first early variety quite popular on parts of the north coast and in the Hawkesbury valley. Scarlet fruits inclined to be pointed on the blossom end. Pkt., 6d; $\frac{1}{4}$ oz., 2/6; oz., 7/6.

ADELAIDE DWARF or CHINESE.—On account of early setting under cool conditions, this variety is popular for early "bagged" crops and for unheated glass-houses. The colour is a bright red. Pkt., 6d; $\frac{1}{4}$ oz., 1/6; oz., 4/6.

RED MARHIO, No. 95, F.W.R.—Very similar to Break o' Day. Fruits are medium sized, mostly globe shaped, and have a scarlet skin with a slight pinkish tinge at certain stages of ripeness. Specially recommended for coastal plantings and for trial in other districts. Pkt., 6d.; $\frac{1}{4}$ oz., 1/6; oz., 4/6.

Tomato—Keystone (Penn. State).

Tomatoes—(Continued).**Burpees Globe.****NEW TOMATOES**

PEARSON.—A new scarlet fruited variety which has given good results in parts of Queensland and Coast of N.S.W. north of Sydney. Fruits are slightly pointed on the blossom end, skin smooth, flesh thick and firm. Second early in maturity. Pkt. 6d.; $\frac{1}{4}$ oz. 1/6; oz. 4/6.

BURPEES GLOBE, No. 1082.—For those who like a pink skinned tomato this is a decided advance on many of the older varieties. Main crop maturity, producing clusters of 6 to 8 medium sized fruits which are smooth, solid and meaty. Pkt. 6d.; $\frac{1}{4}$ oz. 1/6; oz. 4/6.

PRITCHARD, No. 41, F.W.R.—Scarlet, medium sized smooth fruits. Vines short jointed and foliage dense. Pkt., 6d; $\frac{1}{4}$ oz., 1/6; oz., 4/6.

AUSTRALIAN LARGE RED.—Our strain has been selected for freedom from excess roughness of shape usually associated with this variety. Sets well under cooler conditions than many other varieties. Pkt., 6d; $\frac{1}{4}$ oz., 1/6; oz., 4/6.

MAIN-CROP TOMATOES

RUTGER'S No. 91.—F.W.R. A variety from the U.S.A., noted for its high color and delicious flavour. Globe shaped, thick and fleshy. Scarlet fruited, ripening from inside first, when red outside it is coloured right through. Second early to main crop in maturing. Does not set freely under cool conditions early in Spring. Pkt., 6d.; $\frac{1}{4}$ oz., 1/6; oz., 4/6.

MARHIO or MARVELLOUS F.W.R.—Very popular in places where a pink fruited tomato is favoured. The fruit are medium sized, firm and fleshy. True Marhio is a pink fruited variety and may be described as a pink Marglobe. Pkt., 6d.; $\frac{1}{4}$ oz., 1/-; oz., 3/-.

MARGLOBE, CERTIFIED F.W.R.—A main crop scarlet, smooth, solid and globe shaped. A very fine variety for market. Pkt., 6d.; $\frac{1}{4}$ oz., 1/6; oz., 4/6.

MARGLOBE.—Regular. $\frac{1}{4}$ oz., 1/-; oz., 3/-.

NORTON, CERTIFIED.—F.W.R. An improved Stone, or Matchless. This is the largest and best of the late red tomatoes. It is a heavy cropper, and a good market variety, ripening very evenly if picked when commencing to change colour. Specimens frequently reach 12 to 18 ounces in weight. Pkt. 6d.; $\frac{1}{4}$ oz. 1/6; oz. 4/6.

NORTON.—F.W.R. Regular strain. $\frac{1}{4}$ oz. 1/-; oz. 3/-.

SAN MARZANO No. 25.—Special thick fruited strain. Egg shaped tomato, popular with canners because of high colour retained when processed. Does not appear to be as disease resisting as King Humbert. Pkt. 1/-; $\frac{1}{4}$ oz. 2/6; oz. 7/6.

SMALL FRUITED MIXED.—A mixture of various small fruited kinds such as cherry, egg-shaped and pear-shaped tomatoes, red and yellow. Pkt. 6d.; $\frac{1}{4}$ oz. 1/3; oz. 4/-.

KING HUMBERT.—Immense bunches of prune shaped fruit. Pkt. 6d.; $\frac{1}{4}$ oz. 1/-; oz. 3/-; $\frac{1}{4}$ lb. 10/-.

OTHER VARIETIES

The following old varieties have been superseded by improved kinds of greater commercial value. However, as there may be still some districts in which they give excellent results we shall continue to carry small stocks while demand is sufficient to warrant it.

BURWOOD PRIZE.—Pkt. 6d.; oz. 3/-.

BURPEE'S DWARF GIANT.—Pkt. 6d.; $\frac{1}{4}$ oz. 1/9; oz. 5/-.

LIVINGSTON'S GOLDEN QUEEN.—Pkt. 6d.; $\frac{1}{4}$ oz. 1/-; oz. 3/-.

POTATOES, LAWN GRASSES & FARM SEEDS

PRICES OF THESE LINES OFTEN VARY CONSIDERABLY FROM MONTH TO MONTH.

ASK FOR CURRENT PRICES

SEED POTATOES

Our supplies are obtained from reliable growers who are constantly improving their stock by rigid selection for yield and freedom from "leaf roll" and other inherent virus diseases. We strongly advise growers to use only **Government Certified Stock** when available. The higher yields more than pays for the small extra cost of "seed".

FACTOR (Up-to-date).—This popular white skinned variety is the principal one grown in N.S.W. at the present time. It out yields other kinds in most districts.

NEW POTATO

KATAHDIN.—Government Certified Stock. This new early white skinned variety is destined to become the standard variety for N.S.W. New varieties are more vigorous and have not been weakened by virus diseases to the extent of older kinds.

PASTURE GRASSES

PASPALUM DILATATUM.

RHODES GRASS.—Valuable for second class and hilly country.

LAWN GRASSES

4 to 6-lbs. Seed required per 100 square yards.

We can supply heavily re-cleaned seeds specially for lawn as follows:

LAWN COUCH.

AGROSTIS TENUIS.—Creeping Bent grass.

PEAS AND BEANS

COW PEAS; SOY BEANS.

SUDAN GRASS

Ideal summer green feed for poultry.

MAIZE

Varieties.

SORGHUM

SACCALINE, EARLY ORANGE.

MILLET

JAPANESE.—For quick green feed.

SUNFLOWER

LARGE RUSSIAN.—Grown for birds.

TAGOSASTE

The so-called tree lucerne. $\frac{1}{4}$ lb., $\frac{1}{6}$.

HUNTER RIVER LUCERNE

BEST BROADLEAF GIANT.

This is by far the most valuable fodder plant we have and should be grown everywhere. It thrives best on deep sweet soils. While irrigation is necessary for heavy cuttings for hay, it is very drought-resisting and provides excellent grazing in areas of moderate rainfall.

FLOWER SEEDS

LEAFLET ON HOW TO RAISE SEEDLINGS ON REQUEST

See Sowing Calendar, Page 2.

**We shall be pleased to quote Special Rates
for larger quantities than listed**

Hardiness in respect to frost indicated as follows:—H.A.: Hardy Annual; H.H.A.: Half Hardy Annual; T.A.: Tender Annual; H.P.: Hardy Perennial T.P.: Tender Perennial.

ACROCLINIUM, H.A.

GIANT FLOWERED HYBRIDS.—A new strain of this popular "everlasting" for cutting. Blooms much larger than older types. Shades of pink and white double and semi-double. Pkt., 6d; $\frac{1}{4}$ oz., 2/-.

AGERATUM, H.P.

MEXICANUM TALL BLUE.—Showy plant growing up to two feet in height with clusters of bright blue flowers. Pkt., 6d; $\frac{1}{4}$ oz., 1/9; oz., 5/6.

AMARANTHUS, T.A.

MOLTEN FIRE.—Rich maroon foliage, each branch topped bright fiery crimson. Pkt., 6d; $\frac{1}{8}$ oz., 2/6.

ALYSSUM, H.A.

Pkt., 6d; $\frac{1}{4}$ oz., 2/-; each variety.

LITTLE GEM.—Bedding Plant, white, fragrant.

LILAC QUEEN.—Beautiful soft lilac flowers changing to white as they age. A free and continuous bloomer.

PROCUMBENS.—Carpet of Snow. A small trailing species suitable for carpet bedding and rock crevices.

BALSAM, T.A.

DEFIANCE MIXED.—The finest strain of large double flowers. Good for borders or verandah plants. Pkt., 6d; $\frac{1}{4}$ oz., 1/-; oz., 3/-.

BELLIS PERENNIS, H.P.

FINEST DOUBLE MIXED.—English Daisies. Does well in cool climates. Pkt., 6d; $\frac{1}{8}$ oz., 3/-.

BORONIA, H.P.

MEGASTIGMA.—The well-known Brown Scented Boronia, sometimes called "Melbourne Boronia," though it is a W. Australian native. Pkt., 6d; $\frac{1}{4}$ oz., 4/3; 1 oz., 12/6.

BROWALLIA DEMISSA, H.H.A.

A useful bedding plant, carrying freely a fine head of deep sky-blue flowers. Stands hot weather well. Pkt., 6d; $\frac{1}{8}$ oz., 3/6; $\frac{1}{4}$ oz., 6/-.

BRAZILLIAN GLORY PEA

(Sesbania)

This shrubby perennial does best grown from seeds sown in position where plants are to remain, as it does not usually transplant well. Grows 8 to 10 feet and has pretty fern-like foliage and bright scarlet pea shaped flowers. Pkt. 1/-.

BROWALLIA FOR SUMMER BEDDING

ASTERS

Asters are one of our specialities. Our strains are found on the show benches throughout the Commonwealth; for size and quality of bloom there are none better.

Sow Aster seeds as soon as frost danger is over and in mild climates up to January. It is harder to germinate Aster seeds in midsummer when soil is hot than during mild spring weather. Plant out in fairly rich well-drained soil and water regularly.

ASTER WILT.—Varieties marked (F.W.R.) have been grown from Fusarium wilt-resisting stock.

Crego and Californian Giant Type Bloom.

IMPROVED CALIFORNIA GIANTS (Curled and interlaced, special strain).—This is an extra robust strain. It is noted for its immense flowers on long stems. The colours offered are **Deep Rose, Light Blue, Light Purple.** Pkt. 1/-; $\frac{1}{4}$ oz. 5/6; oz. 17/6; each variety.

PAEONY FLOWERED.—An interesting and dainty type producing medium to large blooms having incurved soft frilled petals of exquisite loveliness. Excellent cut flower type available in two most popular florists colours. **Rosebud**, deep rose, and **Azure Fairy**, a light Blue or Lavender. Pkt. 1/-; $\frac{1}{4}$ oz. 5/6; oz. 17/6.

CREGO GIANT, F.W.R.—Good for early sowings. Very vigorous, producing large blooms on long stems.

Crego flowers keep well, and are very fine for table decorations. The petals are curled and twisted like chrysanthemums. The colours are: Enchantress (a fascinating shade of salmon-rose); Rose, Blue Flame, White, Purple. Pkt. 6d.; $\frac{1}{4}$ oz. 1/8; oz. 5/-; $\frac{1}{4}$ lb. 17/6; each variety.

Choice Mixed.—Pkt. 6d.; $\frac{1}{4}$ oz. 1/6; oz. 4/6; $\frac{1}{4}$ lb. 14/-.

ASTERS MUST BE WATERED FREELY

ASTER (Continued).

AMERICAN BEAUTY, F.W.R. (Extra special strain).—Distinct type, they are more dahlia-like in form, and make a fine rounded bush from $2\frac{1}{2}$ to 3 feet in diameter. They are, most of them, much later than other varieties of aster, and come into bloom after the others have finished. The wonderfully fine blooms, are carried on strong stems, making them invaluable for cut flowers. The colours are: Deep Rose, Purple, White, Azure. Pkt. 6d.; $\frac{1}{4}$ oz. 1/9; oz. 5/6; $\frac{1}{4}$ lb. 18/6; each variety.

Mixed.—Pkt., 6d; $\frac{1}{4}$ oz., 1/9; oz., 4/6; $\frac{1}{4}$ lb., 14/-.

American Beauty Type Bloom.

HEART OF FRANCE (New Wilt-Resisting Strain).—A ruby-red aster, flowers of excellent size and perfect formation. Flowering on long and strong stems. Pkt., 6d; $\frac{1}{4}$ oz. 1/9; oz. 5/6.

ROYAL EMPEROR.—Deep Mauve. Popular with some growers for cutting. Pkt. 6d.; $\frac{1}{4}$ oz. 2/6; oz. 7/6.

CANDYTUFT, H.A.**GIANT HYACINTH FLOWERED WHITE.**

Florists strain extra select; grows to $1\frac{1}{2}$ ft. Magnificent spikes. Pkt. 6d.; $\frac{1}{4}$ oz. 1/3; oz. 3/6; $\frac{1}{4}$ lb. 10/6.

UMBELLATA SPECIAL MIXED.—A fine type; excellent for bedding and cutting. As it sells best in mixed bunches we have decided not to stock colours separately. Pkt. 6d.; $\frac{1}{4}$ oz. 1/-; oz. 2/6; $\frac{1}{4}$ lb. 7/6.

CENTAUREA CYANUS, H.A.

(Corn Flower)

Sow where required; do not transplant. Spray for prevention of mildew.

DOUBLE BLUE BOY.—Flowers large, intense blue. Fully double and long stems for cutting. Pkt. 3d.; $\frac{1}{4}$ oz. 1/-; oz. 2/6; $\frac{1}{4}$ lb. 8/6.

CARNATIONS, H.P.

The giant ever-blooming Carnations are unexcelled for bedding where a bright show is desired at a minimum of cost. Best treated as annuals but may be grown on for several years. These strains have been re-selected and improved to bring them to the perfection desirable by the cut flower trade. Climatic influences apparently play an important part in flower formation in some seasons. Reports of this nature have come mainly from Queensland and other warm climates particularly with the *Enfant de Nice* type. It is hoped that these re-selected strains will be less susceptible to this trouble.

ENFANT DE NICE.—The result of crossing Improved Chabaud and Perpetual varieties. This is the last word in annual carnations. Many flowers are $2\frac{1}{2}$ inches across and about 90 per cent. are doubles. Pkt., 1/6; 1-16 oz., 6/-; $\frac{1}{8}$ oz., 11/-; $\frac{1}{4}$ oz., 20/-.

CHABAUD GIANT IMPROVED.—A carnation of the marguerite type, coming into bloom 6 months from seed and producing very large flowers highly clove scented. About 90 per cent of the flowers come double. Pkt. 6d.; $\frac{1}{8}$ oz. 2/6; $\frac{1}{4}$ oz. 4/-; oz. 12/-.

CHABAUD GIANT IMPROVED

CALENDULA, H.A.

(English Marigold.)

"Rust" is a fungus disease which has played havoc with *Calendula* in recent years. We have found regular spraying with Cooper's Colloidal Sulphur will keep it in check in most years. Spraying must be started before the disease makes its appearance.

ORANGE SUNSHINE.—A particularly fine acquisition. Beautiful orange shades of the "sunshine" type. Pkt. 6d.; $\frac{1}{4}$ oz. 1/-; oz. 3/-.

CHRYSANTHA OR SUNSHINE.—Large bright golden yellow flowers, petals somewhat resembling *chrysanthemum*. Pkt. 6d.; $\frac{1}{4}$ oz. 1/-; oz. 3/-.

CAMPFIRE SELECT.—Brilliant orange with crimson or scarlet sheen. Pkt., 6d; $\frac{1}{4}$ oz., 1/3; oz., 4/-.

ORANGE KING.—Special Florists' strain. Rich orange flowers, fully double, well rounded. Pkt., 6d; $\frac{1}{4}$ oz., 1/-, oz., 3/-.

DOUBLE SPECIAL MIXED.—A mixture of all the best types and colours. Pkt., 6d; oz., 2/6.

CELOSIA, T.A.

FLAME OF FIRE.—Pyramidal plants branching out into candelabra shape, each branch topped with a large, almost round, fiery scarlet flower head of coral-like structure. Grow to 18 ins. Fine for cutting. Pkt., 6d; $\frac{1}{8}$ oz., 3/6; $\frac{1}{4}$ oz., 6/6.

FIRE FEATHER.—One of the finest dwarf bedding plants for summer introduced for many years. Compact plants producing 15 to 20 silky plumed heads of dazzling crimson. Good for pots, window boxes or bedding. Pkt., 6d; 1-16 oz., 2/6; $\frac{1}{8}$ oz., 4/6.

GOLDEN FEATHER.—A deep yellow flowered form of above. Pkt., 6d; 1-16 oz., 2/6; $\frac{1}{8}$ oz., 4/6.

PRIDE OF CASTLE GOULD.—Each branch or stem is tipped with a pointed head of richly coloured bloom which later develops into a loose, plumed head of the most brilliant colours; shades of orange and yellow, scarlet and crimson. Pkt. 6d.; $\frac{1}{8}$ oz. 3/6; $\frac{1}{4}$ oz. 6/-.

CHRYSANTHEMUM

The results of growing the double Chinese and Japanese Chrysanthemum from seed are usually so poor that we advise customers to purchase plants of named sorts. List post free on request in Spring. However, excellent results are being obtained with seeds of the following:

INDICUM MIXED (Brunets).—Contains single semi-double and double forms in an enormous range of colours and shades. Excellent for cutting for the home or for sale. Pkt. 1/-; $\frac{1}{8}$ oz. 5/6; $\frac{1}{4}$ oz. 10/-; oz. 30/-.

CLIANTHUS

DAMPIERII.—Commonly known as Dessert Pea. Vivid scarlet pea shaped flowers. Sow in early spring in well drained situation. Pkt. 1/-; $\frac{1}{4}$ oz. 5/-.

COSMOS. H.H.A.

SENSATION.—An early mammoth strain, flowering in about ten weeks from sowing. Large blooms 4-5 inches across in mixture of pink and white. Pkt. 6d.; $\frac{1}{4}$ oz. 3/-; oz. 10/-.

COLEUS. T.A.

These do well in the garden, especially during summer, but as pot and house plants they may be grown indoors or on sheltered verandahs during the winter.

SUNSET MIXTURE.—Large leaves brilliantly coloured, beautifully marked and variegated. Pkts. 1/-, 2/6 and 5/-; 1-16 oz. 8/6.

DAHLIA (Perennial Root)

Undoubtedly the most satisfactory results are obtained from bulbs of named varieties. LIST POST FREE ON REQUEST.

Sow in Spring. As dahlias very seldom come true from seed, the following varieties indicate the types from which seeds are saved. The resulting blooms will usually show a good deal of variation from parent types, and are, therefore, more interesting. Most of them will bloom the first year from seeds, but may show a marked improvement if bulbs are saved for the second year.

CHARM MIXED.—A fine mixture saved from best blooms of the Charm varieties. Pkt. 1/-; $\frac{1}{8}$ oz. 4/-; $\frac{1}{4}$ oz. 7/6.

GARDEN CACTUS MIXED.—Very popular type for cutting and show. Seeds saved from selected plants. Pkt. 1/-; $\frac{1}{8}$ oz. 4/-; $\frac{1}{4}$ oz. 7/6.

DIDISCUS. H.H.A.

(Blue Lace Flower)

COERULEUS.—A native of Western Australia. Very dainty. Pkt. 6d.; $\frac{1}{4}$ oz. 2/6.

DIANTHUS. H.P.

(Pinks)

DOUBLE MIXED.—These popular old garden border plants add charm to any garden. Their sweet carnation perfume is an added attraction. Pkt. 6d.; $\frac{1}{4}$ oz. 2/6; oz. 7/6.

LIST OF DAHLIA ROOTS AND
CHRYSANTHEMUM PLANTS
AVAILABLE IN SPRING.
Free and Post Free.

DELPHINIUM, H.P.

(Perennial Larkspur)

Extreme care must be taken with germination moisture, or failure will result.

As delphinium seed frequently loses viability quickly, it is advisable to sow within three or four months of new seed being available.

The cutting off of Californian supplies during the war means that we will only have one crop of fresh seeds each year instead of two crops as formerly.

PACIFIC GIANTS MIXED.—A new strain originated on the Pacific Coast of U.S.A. by hybridists Vetterle and Reinelt. Produce huge flowers $2\frac{1}{2}$ to $3\frac{1}{2}$ inches in diameter; beautifully spaced on well-balanced spikes. Thin woody stems, and plants show comparative mildew resistance. Practically 100 per cent. double blooms. Pkts. 1/6, 2/6 and 5/-.

GOLD MEDAL MIXTURE.—A splendid assortment, including the fine indigo blues, as well as the lighter colours. Absolutely the best of the Blackmore and Langdon and Kelway types. Enormous spikes on tall stems. New seed February or March. Pkt., 6d; $\frac{1}{4}$ oz., 3/-; oz., 10/-.

BELLADONNA IMPROVED.—The best clear, light blue delphinium for florists' work. Large flowered and strong grower. Grows to 5ft. tall. Pkt., 1/-; $\frac{1}{4}$ oz., 5/-; oz., 18/-. New seed February or March.

CHINENSIS, Blue Butterfly Improved.—Dark blue dwarf variety, 1ft. Pkt. 6d.; $\frac{1}{4}$ oz. 2/6; oz. 8/-. New seeds about March.

CHINENSIS.—Cambridge Blue.—A new clear belladonna blue flowered variety, growing to about 3ft. Pkt. 6d.; $\frac{1}{8}$ oz. 3/-; $\frac{1}{4}$ oz. 5/-. New seeds about April.

GAILLARDIA, H.A.

(Blanket Flower)

PICTA LORENZIANA.—Large, gay-coloured double flowers. Annual type. Pkt., 6d; $\frac{1}{4}$ oz., 1/-; oz., 3/-.

ESCHSCHOLTZIA (Cal. Poppy)

SUNSET MIXTURE.—A blend of all the most recent colours and shades, including orange-king, rose cardinal, scarlet and yellow, yellow and orange-red, prim-rose and pure white. Beautiful new colours. Pkt. 6d.; $\frac{1}{4}$ oz. 1/6.

Godetia—Tall Double Rose.

GODETIA, H.A.

TALL DOUBLE.—Double azalea-like flowers on long stems, excellent for cutting. The best commercial colours are: **Cherry Red Rose** (Schamini); **Rosy Morn.** Pkt., 6d; oz. 1/6; oz. 4/6; $\frac{1}{4}$ lb. 15/-.

TALL DOUBLE MIXED.—Pkt., 6d; $\frac{1}{4}$ oz., 1/ oz. 3/-; $\frac{1}{4}$ lb. 10/-.

SYBIL SHERWOOD.—Single, grows to about 20 inches. Salmon pink; tinted orange, white edges. Pkt. 6d.; $\frac{1}{4}$ oz. 2/6; oz. 7/6.

KELVEDON GLORY.—Single upright type producing large blooms of a very vivid salmon, orange shade. Pkt. 6d.; $\frac{1}{4}$ oz. 2/6; oz. 7/6.

DOUBLE SYBIL SHERWOOD (15 ins.).—Beautiful double form of this popular shade. Pkt. 6d.; $\frac{1}{4}$ oz. 2/6; oz. 7/6.

GYPSOPHYLLA, H.A.

(Baby's Breath)

ELEGANS.—London Market.—Sprays of small white flowers used for making up bunches of sweet peas and other flowers. This is the largest pure white strain grows to $2\frac{1}{2}$ ft. Pkt. 3d.; oz. 1/-; $\frac{1}{4}$ lb. 2/6; lb. 8/-.

HELIANTHUS (Sunflower), H.H.A.

RED.—Chestnut red, tipped with yellow.
Pkt., 3d; $\frac{1}{4}$ oz., 9d.

CHRYSANTHEMUM FLOWERED.—Perfectly double. Pkt., 3d; $\frac{1}{4}$ oz., 9d.

MINIATURE.—Useful for cut flowers. Pkt., 3d.; $\frac{1}{4}$ oz. 9d.

LARGE RUSSIAN.—Pkt., 3d. For large lots, see Farm Seeds.

LARKSPUR, H.A.

Sow in the garden where required during late autumn or early spring.

May sowing seems to give best results in coastal districts. Sow where required to grow and do not transplant.

TALL DOUBLE VARIETIES.—We have selected from the Giant Imperial and Tall Branching types the varieties most suitable for cut-flower work. Seed crops have not yet flowered, but we hope to have supplies by April or May of the following: Dark Blue, Sky Blue, Lustrous Carmine, Rosy Scarlet and La France (Pink). Pkt. 6d.; $\frac{1}{4}$ oz. 2/-; oz. 6/-.

TALL BRANCHING MIXED.—The branching spikes are thickly set with fine double flowers in varied colours. Pkt. 6d.; $\frac{1}{4}$ oz. 1/6; oz. 5/-.

KOCHIA, H.A. (Mex. Fire Plant)

GIANT CHRISTMAS.—A large compact form, staying green much longer. Pkt., 6d.; $\frac{1}{4}$ oz. 1/9; oz. 5/-.

LINARIA, H.A.

(Toad Flax)

EXCELSIOR MIXED.—New hybrids of this remarkable Lobelia-like flower. Pkt. 6d.; $\frac{1}{4}$ oz. 1/9; oz. 5/-.

LUPIN

(See Autumn Catalogue.)

MIGNONETTE, H.A.

The giant flowered Machet types make good growth. We have tried out all the leading types from various countries and can recommend the following strains:—

MACHET GOLIATH, Red.—Robust growth, spreading form; the large spikes frequently measure five inches in diameter. Pkt. 6d.; $\frac{1}{4}$ oz., 1/6; oz. 5/-.

MACHET, Giant Flowering Select.—Deliciously scented grey flowers. Pkt., 3d; $\frac{1}{4}$ oz. 1/6; oz. 4/6; $\frac{1}{4}$ lb. 15/-.

LARKSPUR IS BEST NOT TRANSPLANTED

AFRICAN MARIGOLDS

(*Tagetes Erecta*)

H.H.A.—Sow from Spring to late Summer

Yellow Supreme.

GIGANTEA SUNSET GIANTS.—Blossoms of enormous size on well balanced plants 3 to 4 ft. high. Colours range from deep orange through varying shades of gold and lemon to primrose. Flowers practically free from objectionable marigold odour. About 60 per cent. double. Pkt., 6d; $\frac{1}{4}$ oz., 3/-; oz., 10/6; $\frac{1}{4}$ lb., 35/-.

GUINEA GOLD.—Specially selected stock. Beautiful golden yellow double flowers with fringed petals. Plants grow to 3ft. tall, producing numerous blossoms. Pkt., 6d.; $\frac{1}{4}$ oz. 2/6; oz. 8/-.

LEMON BALL, ALL DOUBLE.—Petals heavily rolled, and flowers ball-like in form; very beautiful. Pkt., 6d; $\frac{1}{4}$ oz., 3/-; oz., 10/6.

ORANGE BALL, ALL DOUBLE.—A rich, brilliant orange. Pkt., 6d; $\frac{1}{4}$ oz., 3/-; oz., 10/6.

MARIGOLD

"ODOURLESS" MIXED.—A select mixture for bedding and cutting saved from a large range of odourless foliaged varieties including Crown of Gold, Yellow Crown and other varieties in shades from light lemon yellow to deep gold. Grow 15 inches to 24 inches and flower at a very early date from sowing. Pkts. 1/- and 2/6.

Sunset Giants.

BURPEE GOLD.—Odourless Foliage.—A real advance in marigolds, rich deep golden orange, large-sized blossoms to 3½ ins. Early finely double and rich green foliage. Grows to 2½ feet. Pkt., 6d; $\frac{1}{4}$ oz., 2/-; oz., 6/-.

YELLOW SUPREME.—Tall, double lemon yellow. Broad frilled petals. Pkt., 6d; $\frac{1}{4}$ oz. 2/6; oz. 8/6.

BURPEE GOLD.

(Continued overleaf)

NOT ALL MARIGOLDS HAVE OBJECTIONABLE ODOUR

African Marigolds—(Continued)

SUPREME MIXED.—Increasing the colour range of the now popular Yellow Supreme by the addition of orange, golden and primrose shades. In addition, this new strain is much earlier flowering than the original strain. As a commercial grower you cannot afford to be without it. Pkt., 6d; $\frac{1}{4}$ oz., 2/-; oz., 6/-.

CHRYSANTHEMUM FLOWERED HYBRIDS.

—A strain of great promise. The delightfully formed flowers resemble incurved chrysanthemums. They are carried on long stems of excellent value for cutting. Colours are gold, lemon, yellow and orange. Pkt., 6d; $\frac{1}{4}$ oz., 3/-; oz., 9/-.

NASTURTIUM, H.A.

Nasturtiums will grow and bloom in almost any soil but it should not be too rich for the greatest wealth of bloom.

DOUBLE GOLDEN GLEAM.—A popular shade for cutting. Good form and substance. Vigorous growing habit Pkt., 6d.; oz. 2/-; $\frac{1}{4}$ lb. 7/-.

DOUBLE HYBRIDS MIXED.—Glorious colours in Giant Double Sweet Scented blooms up to three inches across and ranging from pale primrose through all shades of lemon and gold to shades of scarlet, orange scarlet, rose, and deep velvety crimson; also splashed and mottled shades. The scarlet and orange scarlet shades predominate. We recommend autumn sowing in coastal and warm districts, and they may be sown after frosts in the cooler parts. Pkt. 6d.; oz. 2/-; $\frac{1}{4}$ lb. 7/-.

WARF GLOBE MIXED.—A colourful mixture of beautiful shades ranging from creamy white to yellow, rose, salmon, salmon pink, orange, cerise, scarlet, blood red, crimson and mahogany. Plants are dwarf and compact, forming globe shaped bushes about 12 ins. high. Double and semi-double flowers produced freely on long stems suitable for cutting. Pkt., 6d.; oz. 2/-; $\frac{1}{4}$ lb. 7/-.

PANSY

(See Autumn Catalogue.)

PORTULACCA, H.H.A.

DOUBLE MIXED.—A fine strain, with very brilliant flowers in many colours. Fine for bedding. Pkt., 6d; $\frac{1}{8}$ oz., 3/-; $\frac{1}{4}$ oz., 5/-.

Double Hybrids.

PHLOX DRUMMONDI, H.A.

Sow from early spring to early autumn in the garden where required. A pretty effect is obtained by sowing patches of the various colours desired wherever space is available. A few seeds are sown at each spot at 9 to 12-inch spacings.

GRANDIFLORA COLOURS.—We offer this year separate tall varieties as follow:—**White, Reddish Purple, Flesh, Scarlet, Chamois Rose** with white eye, **Buff Yellow, Bright Rose, and Striped.** Pkt. 6d.; $\frac{1}{4}$ oz. 3/-; oz. 10/-; each variety.

FINEST MIXED.—A blend of the tall annual phlox of best varieties. Pkt., 6d; $\frac{1}{4}$ oz., 2/6; oz. 8/6.

GIGANTEA, ART SHADES.—A giant race of this delightful summer annual. Mixed varieties. Pkt., 6d; $\frac{1}{8}$ oz., 3/6; $\frac{1}{4}$ oz., 6/6.

DWARF COMPACT MIXED.—Excellent strain for edging and dwarf bedding. Particularly useful in windy spots where taller type may be damaged by strong winds. Excellent selection of colours. Pkt. 6d.; $\frac{1}{4}$ oz. 2/6; oz. 8/6.

THERE IS NOTHING TO EQUAL PHLOX FOR SUMMER BEDDING

SNAPDRAGONS (Antirrhinum)

(For full description see autumn catalogue.)

ANOTHER RUMSEY SPECIALITY.

December sowings produce best quality spikes. Roots become well established before winter, resulting in high quality blooms in early winter and again in spring. They may be sown up to early March for quality spring blooms. Spring sowings are seldom as satisfactory. First flowers are usually rather short from spring sowings, but length of stem will improve in the following autumn.

Present demand is mainly for bright rose, terra cotta and apricot shades with smaller quantities of yellow, deep reds and white.

Giant Mixed.

TALL LARGE-FLOWERING GIANTS.

Pkt. 6d.; $\frac{1}{8}$ oz. 1/9; $\frac{1}{4}$ oz. 3/-; oz. 10/-.
Available in the following shades:—

Sunnybrook (Tango); Fordhook Rose;

Canary Bird; Orchid; Ruby; Wallflower.

Giant Mixture.—A blend of the best colours. Pkt. 6d.; $\frac{1}{8}$ oz. 1/6; $\frac{1}{4}$ oz. 2/9; oz. 9/-.

MAJESTIC SEMI-TALL.

Pkt. 6d.; 1-16 oz. 2/-; $\frac{1}{8}$ oz. 3/6; $\frac{1}{4}$ oz. 6/-; oz. 20/-.

These produce giant flowers on half dwarf stems. For florists' work they are unexcelled.

Evensong, chamois pink, apricot and buff; **Rose Marie**, salmon rose; **Rosella**, rose; **Sunset**, shades from bright terra-cotta to lovely salmon; **Orange King**.

Majestic Mixed.—A blend of the best colours and varieties. Pkt. 6d.; $\frac{1}{8}$ oz. 2/6; $\frac{1}{4}$ oz. 4/6; oz. 15/-.

INTERMEDIATE VARIETIES.

SCARLET TRIUMPH

The most vivid scarlet snapdragon ever offered. Pkt. 1/-; 1-16 oz. 3/6; $\frac{1}{8}$ oz. 6/-.

These improved strains grow plenty tall enough for cut-flower work. They are also excellent for bedding.
Pkt. 6d.; 1-16 oz. 2/-; $\frac{1}{8}$ oz. 3/6; $\frac{1}{4}$ oz. 6/-, except where stated.

White Rock.—The best white; **Cheviot Maid Supreme**, deep rose pink, long flower spikes of particular merit; **Orlando**, rich bronze.

Half Dwarf—Fancy Mixed.—The half-dwarf varieties are about the best for bedding and bordering purposes, and produce stems of flowers long enough for cutting, though not as large as the giant varieties. Pkt. 6d.; 1-16 oz. 1/6; $\frac{1}{8}$ oz. 2/6; $\frac{1}{4}$ oz. 4/6; oz. 12/6.

HAVE YOU TRIED MAJESTIC SNAPDRAGONS?

PETUNIA—Giant Fringed.

PETUNIAS, H.P.

Best treated as annuals in warm climate.
Sow in late spring for summer blooming.

ROSE OF HEAVEN.—The most popular bright rose pink petunia for bedding. Very select strain. Pkt. 6d.; $\frac{1}{8}$ oz. 3/6; $\frac{1}{4}$ oz. 6/.

BLUE BEDDER.—Popular deep violet blue dwarf, compact strain. Grows about 12 inches high. Pkt. 6d.; $\frac{1}{8}$ oz. 3/6; $\frac{1}{4}$ oz. 6/.

ENCHANTRESS MIXTURE.—A mixture of all the best varieties of tall bedding petunia. Pkt. 6d.; $\frac{1}{8}$ oz. 2/9; $\frac{1}{4}$ oz. 5/.

PETUNIA GIANT FRINGED MIXED

Petunia hybrida grandiflora fimbriata is the largest and best of the frilled Petunias. Wonderful range of colours. Edges of petals are fringed as well as ruffled. Pkts., 1/6, 2/6, and 5/.

POPPY

(See Autumn Catalogue.)

SALPIGLOSSIS, H.H.A.

(Velvet Flower)

Sow in the garden where required to grow in Spring or early Summer.

EMPEROR.—Very large, petunia-shaped flowers with brilliant veinings. Many colours. Pkt. 6d.; $\frac{1}{4}$ oz. 2/-; oz. 6/.

SALVIA, H.P. (Flowering Sage)

Best treated as annuals. Sow under glass in early Spring or in seed bed or boxes in late Spring or Summer.

SUTTON'S SCARLET.—Most vivid scarlet Salvia yet introduced. For bright display it excels. Pkt. 6d.; $\frac{1}{8}$ oz. 2/-; $\frac{1}{4}$ oz. 3/6; oz. 12/.

SPLENDENS-BONFIRE.—The well known strikingly brilliant border bush. Pkt., 6d; $\frac{1}{8}$ oz., 2/-; $\frac{1}{4}$ oz., 3/6; oz., 12/.

SCABIOSA, H.A.

The Pin Cushion or Mourning Bride are amongst the most useful and hardy cut flowers. Gives best results in cool mountain climates in spring or autumn.

GIANT HYBRIDS MIXED.—A super strain of excellent colours of the tall double type. Pkt., 6d; $\frac{1}{4}$ oz., 2/-; oz., 6/.

SWEET PEA

(See Autumn Catalogue.)

STATICE

PERENNIAL—Hardy.

PEREZII.—Rich Blue perennial. Pkt., 6d; $\frac{1}{8}$ oz., 2/6.

ANNUALS—Hardy.

Pkt. 6d.; oz. 1/6; $\frac{1}{4}$ lb. 5/-, except where priced.

BONDUELLI.—Yellow.

SINUATA.—Market Growers' Blue. Excellent cut flower variety.

SINUATA ROSEA SUPERBA.—Pink.

SINUATA NEW HYBRIDS, Mixed.

Pkt. 6d.; oz. 2/6; $\frac{1}{4}$ lb. 8/6.

STOCK

(See Autumn Catalogue.)

YOU WILL LIKE SUTTON'S SCARLET SALVIA

TORENIA, T.A.

Beautiful annuals. Very effective for late summer borders.

FOURNEIRI GRANDIFLORA.—Dark blue, yellow throat. Pkt., 1/-; 1-16 oz., 2/-.

VERBENA, H.P. (Trailing Plant)

Sow while soil is warm and moist. October or early Autumn. Frequently takes 3 or 4 weeks to germinate, but once established is quite hardy.

GIANT MIXED.—This is an excellent blend of the finest colours and shades selected from the large flowering type. Pkt. 6d.; $\frac{1}{8}$ oz. 2/6; $\frac{1}{4}$ oz. 4/6.

Giant Verbena.

SEEDS OF CLIMBERS

CARDINAL CLIMBER (*Ipomea cardinalis*), H.H.A.—The vines grow rampantly, and are always covered with a wealth of the beautiful blossoms: as fast as one flower dies, there is another to take its place. Pkt., 6d.

CANARY BIRD CREEPER, H.H.A.—A handsome climber with handsomely fringed yellow flowers and delicate foliage. Pkt. 6d.

COBAEA SCANDENS, H.P.—A rapid growing climber, with large bell-shaped flowers of a deep purple colour. Pkt., 6d.

DOLICHOS, H.P.—Lignosus.—About the most rampant perennial climber and freest bloomer there is; useful for covering sheds. Pink, White. Pkt., 6d.

LATHYRUS LATIFOLIUS.—Perennial Pea. Live year after year, bearing beautiful clusters of flowers; mixed. Pkt., 6d.

LATHYRUS PUBESCENS.—A beautiful blue perennial pea. Free climber. Pkt., 1/-.

MINA LOBATA.—A truly gorgeous flowering annual vine; flowers cream and red. Pkt., 6d.

MOONFLOWER (*Calonyction aculeatum*).—Immense sky-blue flowers cover the plant from top to bottom in a very short time from planting. Perennial, 6d.

MORNING GLORY, H.A. (*Ipomea purpurea*).
—**Tall Mixed.**—Shades of light blue, purple, pink and variegated. Pkt., 6d.

MORNING GLORY, H.A. (*Ipomea hederacea*)
—Japanese Frilled and Fancy Mixed. Very quick growing. Pkt., 6d.

SNAIL CREEPER, T.P.—A free growing hardy useful vine covers fences with a leafy growth, and curious snail-like flowers. Pkt., 6d.

MIXED CLIMBERS.—A generous packet containing a good assortment of beautiful climbers. Pkt., 6d.

ZINNIA, H.H.A.

Sow in spring after all frost danger is over and soil has commenced to warm up. Sowing may be continued up to December and January in mild climates. Sow either in the garden where required or in seed beds or boxes for transplanting.

GIANT DAHLIA FLOWERED.

ZINNIA—DAHLIA FLOWERED.

Flowers of immense size, borne on good sturdy stems. Plants make a compact bush 3ft. tall. A decided improvement on old types of Zinnias.

COLOURS: **Exquisite**, rose; **Tango**—Large blooms of attractive golden orange colour with reddish orange centres. **Dream**, deep lavender; **Canary Bird**, primrose; **Polar Bear**, white; **Crimson Monarch**; **Oriole**, golden orange. Pkt., 6d.; $\frac{1}{4}$ oz. 2/6; oz. 8/6; $\frac{1}{4}$ lb. 30/-; each variety.

MEXICAN.

DOUBLE MIXED.—This is quite a new race of small Zinnias of great beauty. For bedding and bordering purposes they are unsurpassed. While sufficiently of the form of the old Zinnias to identify them, they are dwarf, and quite distinct from them, and they vary in colour and markings, being mostly yellow and orange, but many having quite distinct purple markings. Pkt., 6d.; $\frac{1}{4}$ oz., 2/-.

DOUBLE POMPOM, OR LILLIPUT.

One of the very best types for bedding or for cutting for the house.

SPECIAL MIXED.—Pkt. 6d.; $\frac{1}{4}$ oz. 2/-; oz. 7/-.

ZINNIA POMPOM.

DO NOT SOW ZINNIAS UNTIL SOIL IS WARM

ZINNIAS—(Continued)**GIANTS OF CALIFORNIA.**

A magnificent strain of Zinnias, having large symmetrical flowers. A very vigorous type, bushes growing 3 to 4 feet tall and 2 to 3 feet in diameter.

MIXED.—A mixture of the best shades. Pkt., 6d.; $\frac{1}{4}$ oz. 2/-; oz. 7/-; 4 oz. 25/-.

ZINNIA—GIANTS OF CALIFORNIA.**BULBS****LILIUM (June to August).**

Postage extra.

REGALE.—Flowers are borne on a sturdy stem in clusters of 4 or more blooms with petals a waxy white with yellow flushed throat. 1/6 and 2/- each.

AURATUM.—Golden Rayed Lily. 4/- each.

RUBRUM.—White suffused rose, heavily spotted. 1/6 each.

SULPHUREUM.—Sulphur Yellow fading to White, Purple mid ribs. 4/- each.

HENRYI.—Bright Orange Yellow, slightly spotted reddish brown. 1/6 each.

TIGRINUM (Tiger Lily).—Single, 1/- each 10/- doz. **Double,** 1/- each, 10/- doz.

GLADIOLUS (June to Sept.)

Postage extra.

Enormous range of colours and shades now available in the giant flowered exhibition and decorative types.

Priced according to variety and size of bulbs.

Popular varieties, 6d. each, 5/- dozen.

Recent introductions, 1/6 each, 15/- dozen.

Selected varieties, 1/- each, 10/- dozen.

Choice Mixed, 3/- dozen, 20/- 100.

BULK PRICES TO GROWERS

Rumseys Plant List

ORNAMENTAL AND FLOWERING TREES AND SHRUBS. ROSES, HEDGE PLANTS, FRUIT TREES, VINES AND STRAWBERRIES.

This list contains the most popular varieties, but we will always obtain others for customers requiring them, if procurable.

STRAWBERRY PLANTS

For many years it has been customary in N.S.W. to make main plantings of strawberries in Autumn (April and May). However, during the last three or four years many of the most successful growers have obtained much better results from spring planting. July being favoured in coastal districts and August in the cooler mountain areas.

Due to the "Leaf Crinkle" virus disease which appears to be present in practically all N.S.W. coastal districts it is almost impossible to obtain supplies of plants absolutely free of the trouble but by systematic rogueing throughout the growing season we have been able to considerably improve on strains offered during recent years. Many varieties showing pronounced susceptibility to infection have been temporarily abandoned and we will not offer them for sale until "clean" strains can be produced.

The following varieties are what we offer this year.

PRICES AND VARIETIES

1/- dozen; 50 for 3/6; 6/- 100. Special quotation for 1000 lots. For country orders, add 4d. dozen; 1/- for 50; 1/6 100 extra for freight and packing.

GILBERT'S SEEDLING.—The result of a chance cross between Fendalcino and Rhodes Special, this new strawberry has the large sized fruit of Rhodes Special as well as much of the rich deep color of Fendalcino. Being a new seedling it can be expected to be free from leaf crinkle virus diseases for some years. Produces enormous crops of excellently flavoured berries and is early maturing. A "perfect flowering" kind, it is not necessary to grow another sort adjacent to ensure pollination. In our opinion Gilbert's Seedling would be very suitable to grow with Fendalcino, which bears a pistolate flower only, to ensure satisfactory pollination of the latter. Price 1/6 per doz.; 5/6 per 50; 10/- per 100. Special quotes for 1000 lots. Freight and Packing Extra, as above.

FENDALCINO.—Popular market berry, large size and splendid flavor. It is not, however, self fertile, and must be grown with another variety in at least every third row. Under this method it is very prolific. Although not absolutely free from "Leaf Crinkle", we maintain that we have the healthiest stock of this variety that there is available.

CRESWELL'S SEEDLING.—Popular market berry. We have located a stock of this excellent variety reasonably free from "crinkle". Very heavy producing strain. Self fertile.

PHENOMENAL.—This popular Queensland variety has shown considerable resistance to "Leaf Crinkle". It is one of the best commercial strains for coastal planting from Sydney north. Self pollinated.

THE AUSTRALIAN BOOK OF BERRIES

By Herbert J. Rumsey—Third Edition. The best Australian publication on small fruit culture, including Strawberry, Loganberry, Raspberry, Gooseberry and Currant. Price 1/3 (including postage and tax).

RUMSEYS SEEDS PTY. LTD.

FRUIT TREES and NUTS

Remit extra for Postage or Freight. For Rates, see Seed Catalogue. Approximate weights packed, 1 tree 3-lb., add 1-lb. for each additional tree. Any balance will be sent in seeds or returned

PLANTING.

Deciduous trees, that is those that drop their leaves during Winter, should be planted while dormant, which is from May to August inclusive. June and July are generally best, but in some very cold districts later planting is advisable.

Planting times for citrus trees (oranges, lemons, grapefruit, etc.), are somewhat different. In mild climates Autumn (March and April) are good months, especially when good rains are experienced early in Autumn. In cooler districts where there is danger of frost injury to young trees, Spring planting is recommended (August to September).

VARIETIES.

There are hundreds of varieties of trees but in most districts it is advisable to limit the range to well known kinds which have proven their suitability to the district where they are to be planted. We can supply most of the popular kinds and if desired we will select varieties which in our opinion will suit our customers' requirements.

PRICES :

Persimmons, 2/- each, 21/- dozen.
Loquats, 2/- each, 21/- dozen.
Mulberry—Hicks, 2/- each, 21/- dozen.
Mulberry, English, 2/6 each.

Rumseys Plant List

ORNAMENTAL AND FLOWERING TREES AND SHRUBS. ROSES, HEDGE PLANTS, FRUIT TREES, VINES AND STRAWBERRIES.

This list contains the most popular varieties, but we will always obtain others for customers requiring them, if procurable.

STRAWBERRY PLANTS

For many years it has been customary in N.S.W. to make main plantings of strawberries in Autumn (April and May). However, during the last three or four years many of the most successful growers have obtained much better results from spring planting. July being favoured in coastal districts and August in the cooler mountain areas.

Due to the "Leaf Crinkle" virus disease which appears to be present in practically all N.S.W. coastal districts it is almost impossible to obtain supplies of plants absolutely free of the trouble but by systematic rogueing throughout the growing season we have been able to considerably improve on strains offered during recent years. Many varieties showing pronounced susceptibility to infection have been temporarily abandoned and we will not offer them for sale until "clean" strains can be produced.

The following varieties are what we offer this year.

PRICES AND VARIETIES

1/- dozen; 50 for 3/6; 6/- 100. Special quotation for 1000 lots. For country orders, add 4d. dozen; 1/- for 50; 1/6 100 extra for freight and packing.

GILBERT'S SEEDLING.—The result of a chance cross between Fendalcino and Rhodes Special, this new strawberry has the large sized fruit of Rhodes Special as well as much of the rich deep color of Fendalcino. Being a new seedling it can be expected to be free from leaf crinkle virus diseases for some years. Produces enormous crops of excellently flavoured berries and is early maturing. A "perfect flowering" kind, it is not necessary to grow another sort adjacent to ensure pollination. In our opinion Gilbert's Seedling would be very suitable to grow with Fendalcino, which bears a pistillate flower only, to ensure satisfactory pollination of the latter. Price 1/6 per doz.; 5/6 per 50; 10/- per 100. Special quotes for 1000 lots. Freight and Packing Extra, as above.

FENDALCINO.—Popular market berry, large size and splendid flavor. It is not, however, self fertile, and must be grown with another variety in at least every third row. Under this method it is very prolific. Although not absolutely free from "Leaf Crinkle", we maintain that we have the healthiest stock of this variety that there is available.

CRESWELL'S SEEDLING.—Popular market berry. We have located a stock of this excellent variety reasonably free from "crinkle". Very heavy producing strain. Self fertile.

PHENOMENAL.—This popular Queensland variety has shown considerable resistance to "Leaf Crinkle". It is one of the best commercial strains for coastal planting from Sydney north. Self pollinated.

THE AUSTRALIAN BOOK OF BERRIES

By Herbert J. Rumsey—Third Edition. The best Australian publication on small fruit culture, including Strawberry, Loganberry, Raspberry, Gooseberry and Currant. Price 1/3 (including postage and tax).
